GREETINGS

I am very pleased to know that the Statistics Coordination Office, Kaski is publishing the “Gandaki Province Socio-Demographic Indicators” based on the data from National Population and housing census 2021. On this occasion, I extend my best wishes for the successful release of this important publication.

This report is intended to provide comprehensive and reliable information on the geographic, demographic, economic, social, and inter-sectoral characteristics of Gandaki Province and Local Levels from Gandaki Province. It is anticipated that the data and insights contained herein will serve as a vital reference for evidence-based policy formulation, planning, and decision-making at both provincial and local level government.

By consolidating and presenting scattered and diverse sectoral data of Gandaki Province, this report will serve as a valuable resource for the provincial ministries, commissions, offices, Local Levels, intergovernmental and non-governmental organizations, academicians, students, researchers, and the general public.

I commend the Statistics Coordination Office, Kaski, for its diligent efforts in the preparation of this publication. I am confident that this document will be widely disseminated and effectively utilized for the development of Gandaki Province.

Thank you

16th July, 2025

FOREWORD

I am very pleased to know that the Statistics Coordination Office, Kaski is publishing the “**Gandaki Province Socio-Demographic Profile**”. On this occasion, I would like to extend my sincere best wishes.

This publication aims to make available comprehensive information and data on various geographic, demographic, economic, social, and inter-sectoral aspects of Gandaki Province to concerned stakeholders. It is expected that this report will support evidence-based policy formulation, decision-making, program planning, monitoring, and evaluation processes at the provincial and local levels.

This socio-demographic profile will be a valuable resource for individuals and institutions seeking to learn about Gandaki Province, as well as for policymakers, planners, social workers, researchers, teachers, students, tourists, and other interested parties in different sectors.

Finally, I would like to express my sincere appreciation to the Statistics Coordination Office, Kaski, its chief, and all the staff involved in this important work, as well as to all ministries, offices, local levels, institutions, and stakeholders who contributed by providing necessary data and information. I wish for the successful dissemination and effective use of this publication.

Dr. Krishna Chandra Devkota

The National Statistics Office (NSO) completed the twelfth round of the National Population and Housing Census (NPHC) in 2021. Since its establishment, the NSO has been producing data related to social, demographic, economic, and environmental aspects of the country. Based on the results of NPHC 2021, the NSO has published several statistical and thematic reports. The NPHC remains the only source that provides data down to the lowest administrative unit, i.e., the Wards of Local Levels.

The NSO has 18 Statistics Coordination Offices (SCOs), which are responsible for carrying out national censuses, surveys, and other statistical activities as directed by the NSO. These offices also implement statistical work at the provincial, district, and local levels, and are tasked with coordinating statistical activities within their assigned districts.

I am very pleased to see the Statistics Coordination Office, Kaski, take the initiative to compile and publish the report "*Gandaki Province Socio-Demographic Indicators*." This report presents a valuable set of indicators for Gandaki Province based on the NPHC 2021.

This publication is expected to help meet the growing demand for disaggregated data and support evidence-based policymaking at the provincial and local levels. The real value of data is realized when it is used meaningfully in decision-making. I believe this report will be a useful resource for policymakers, planners, researchers, and other data users.

I would like to sincerely thank the entire team of the Statistics Coordination Office, Kaski, for their hard work, dedication, and commitment in bringing out this important publication. This is a commendable effort by SCO Kaski, and I encourage them to continue such creative work in the future.

July, 2025

Maddhu Sudan Burlakoti
Chief Statistician

Foreword

Access to reliable and timely information is crucial for sustainable, evidence-based decision-making. Social and demographic data, in particular, serve as indispensable tools for effective development planning and resource allocation. The socioeconomic conditions of a country, and their changes over time, can be assessed through systematic data collection efforts such as the decennial National Population and Housing Census. These data provide a foundation for understanding the current situation, monitoring progress, and charting future policy directions.

Following the successful completion of the National Population and Housing Census 2021, the National Statistical Office (NSO) has published numerous reports focusing on national, provincial, and local levels. In line with the growing demand for more disaggregated, province- and Palika-level statistics, the Statistics Coordination Office, Kaski, under the guidance of NSO, has prepared this comprehensive report containing key demographic, social, and economic indicators for Gandaki Province and Constituent Local Levels.

This publication presents a detailed portrait of Gandaki Province's population and socio-demographic profile, providing insights into areas such as literacy, education, migration, household characteristics, labor force participation, and wealth distribution. These indicators have been carefully compiled to assist policymakers, local governments, planners, researchers, and development partners in designing evidence-based programs, identifying regional disparities, and monitoring development outcomes.

I would like to extend my sincere appreciation to the team at the Statistics Coordination Office, Kaski, for their dedicated efforts in compiling and preparing this important report. I also express my special thanks to the Chief Statistician Officer of the National Statistical Office, as well as the Deputy Chief Statistician, for their continued guidance, encouragement, and valuable technical insights throughout the preparation of this report. Their leadership and direction have been instrumental in ensuring the quality and relevance of this publication.

Finally, I express my gratitude to all the local governments, enumerators, and respondents whose cooperation made the Census 2021 possible. I trust that this report will serve as a valuable resource for policymakers, planners, researchers, development practitioners, and the public. We welcome suggestions and feedback from users to help refine and improve future statistical products.

Nanda Lal Sapkota

Statistics Coordination Officer

Population Distribution, 2021	10
Proportional Distribution of Population, 2021	12
Population Density, 2021.....	14
Population Growth Rate, 2021	16
Household Distribution, 2021	18
Average Household size, 2021.....	20
Sex Ratio, 2021.....	22
Child Woman Ratio, 2021	24
Total Dependency Ratio, 2021.....	26
Child Dependency Ratio, 2021	28
Female Child Dependency Ratio, 2021	30
Male Child Dependency Ratio, 2021	32
Aged Dependency Ratio, 2021	34
Proportion of 75 and above population, 2021	36
Proportion of aged 75 and above male population, 2021	38
Proportion of 75 and above female population, 2021.....	40
Singulate Mean Age at Marriage for Male, 2021.....	42
Singulate Mean Age at Marriage for Female, 2021	44
Proportion of People in Urban Area, 2021	46
Proportion of People in Peri Urban Area, 2021	48

Proportion of People in Rural Area, 2021	50
Absent Population Abroad as Percentage of Total Population, 2021	52
Proportion of Absent Within Country, 2021	54
Wealth Quintile Distribution, 2021.....	56
Native Born Population, 2021	60
Internal Migrants Population, 2021	62
Foreign Born Population, 2021	64
Nuclear Family, 2021	66
Extended Family, 2021	68
Male Household Head, 2021	70
Female Household Head, 2021.....	72
Chapter 2: Economic Activity	74
Total Usually Economically Active Ratio, 2021	76
Male Usually Economically Active Ratio, 2021	78
Female Usually Economically Active Ratio, 2021	80
Usually Economically Active Female to Male Ratio, 2021	82
Usually Economically Active Female to Male Aged (15-24) Ratio, 2021	84
Ratio of Person in Non-agriculture to Agriculture, 2021.....	86
Proportion of Households with Agriculture Land, 2021	88
Households with Outstanding Loans	90
Proportion of Households Received Grants for Residential Building, 2021	92
Saving Account on Bank and Financial Institutions, 2021	94
Households with Vocational and Technical Training, 2021	96
Households Operating Small Scale Non-Agriculture, 2021	98
Economically Active Population in Agriculture, 2021	102
Economically Active Male in Agriculture, 2021.....	104
Economically Active Female in Agriculture, 2021	106
Chapter 3: Infrastructure	108
Distribution of Buildings, 2021	110
Proportion of Residential Buildings, 2021	112
Proportion of Vacant Buildings, 2021	114

Proportion of Budlings with aged (0-9), 2021.....	116
Proportion of Budlings with aged (10-19), 2021.....	118
Proportion of Budlings with aged (20-29), 2021.....	120
Proportion of Budlings with aged (30-39), 2021.....	122
Proportion of budlings with aged (40-49), 2021.....	124
Proportion of Buildings Aged 50 Years and Above, 2021	126
Chapter 4: Health and Environment.....	128
Proportion of Households with Access to Improved Fuel for Cooking, 2021	130
Access to Clean Drinking Water, 2021	132
Access to Improved Toilet Facilities, 2021	134
Improved Lighting Facility, 2021	136
Prevalence of Disability, 2021.....	138
Chapter 5: Education	140
Total Literacy Rate, 2021	142
Male Literacy Rate, 2021	144
Female Literacy, 2021	146
Adult Total Literacy, 2021	148
Adult Male Literacy, 2021	150
Adult Female Literacy, 2021	152
Prime Age Total Literacy, 2021.....	154
Prime Age Male Literacy, 2021	156
Prime Age Female Literacy, 2021.....	158
Ratio of Literate Female to Male in Prime Age, 2021	160
Proportion of Currently Attending School Population of Aged (5-25) Years, 2021.....	162
Proportion of School Ever Attending Population Aged (5–25) Years, 2021	164
Proportion of School Never Attending Population Aged (5–25) Years, 2021	166
Proportion of School Never Attending Male Aged (5–25 Years), 2021	168
Proportion of School Never Attending Female Aged (5–25), 2021	170
Chapter 6: Children.....	172
Child Economic Activity, 2021.....	174

Male Child Economic Activity, 2021.....	176
Female Child Economic Activity, 2021	178
Child Marriage, 2021	180
Male Child Marriage, 2021	182
Female Child Marriage, 2021	184
Living With a Step Parent, 2021.....	186
Children Living with Other Relatives and Others, 2021	188
Proportion of Currently Attending School Population of Aged (5-17) Years, 2021.....	190
Proportion of School Ever Attending Population Aged (5–17) Years, 2021	192
Proportion of School Never Attending Population Aged (5–17) Years, 2021	194
Proportion of School Never Attending Male Aged (5–17) Years, 2021	196
Proportion of School Never Attending Female Aged (5–17) Years, 2021	198
Chapter 7: Gender	200
Female Ownership of Assets, 2021.....	202
Female Ownership of House Only, 2021.....	204
Female Ownership of Land Only, 2021	206
Female Ownership of House and Land, 2021	208
Gender Imbalance, 2021	210
Proportion of Widows, 2021	212
Proportion of Widower, 2021	214
Proportion of Divorced or Separated, 2021.....	216
Prevalence of Marriage before Age 15 among Persons Aged 20–24, 2021.....	218
Prevalence of Marriage before Age 15 among Males Aged 20–24	220
Prevalence of Marriage before Age 15 among Female Aged 20–24	222
Prevalence of Marriage before Age 18 among Both Sex (Age Group 20-24), 2021.....	224
Prevalence of Male Marriage Before Age 18 (Age Group 20-24), 2021	226
Prevalence of Female Marriage Before Age 18 (Age Group 20-24), 2021.....	228

An introduction to the National Population and Housing Census 2021

1. Introduction

The census taking in Nepal dates back to more than a century. The National Population and Housing Census 2021 (NPHC 2021) is the twelfth decennial census since 1911 A.D. (1968 B.S.) - the first census taking year in Nepal. The four censuses before 1952/54 were simple head counts and they did not have qualities of modern census. But the fifth census conducted in 1952/54 utilized internationally comparable concepts, definitions and classifications as recommended by the United Nations. So it is considered as the first modern census of Nepal. The 1961 census was carried out by the Central Bureau of Statistics after its establishment in 1958 by the Statistics Act 1958. The 1971 census introduced Computer processing for the first time using IBM 1401. The 1981 census introduced questions on economic activities of individuals and maps for field work, and assessment of the quality of enumeration began from this census. The 1991 census is the first census after the restoration of multiparty democracy and this census introduced, for the first time, collecting details of caste and ethnicity of individuals. The 2001 census introduced sample survey for some of the questions of census for the first time and two types of forms were used, one for full count and the other for sample counts. But the field work for this census could not be completed in 957 wards of 12 districts, due to effect of armed insurgency in the country, for which estimation methodology was adopted. This census introduced the use of modern GIS cartographic maps for the field work, gender friendly concepts, collection of detail socio-economic activities of women and data entry management by a private party. The 2011 census continued the earlier provisions except introducing an independent observation of census field work by civil society. Most noticeable feature of this series is that the whole census operation was almost funded by the domestic resources.

NPHC 2021 is the first national census conducted after the country embarked into federal system of governance formally. The salient features of NPHC2021 are the following:

- Adoption of full census enumeration for household and individual information unlike use of sampling in 2001 and 2011.
- As additional legal framework, introduction of Census Management and Operation Order, 2019 (2076 BS), Census Management and Operation Procedure, 2020 (2077 BS), and administrative management and financial standards for the census, 2019 (2076 BS) by the Council of Ministers, Government of Nepal.
- Introduction of e-census for government personnel working in the diplomatic missions abroad and their dependents usually residing there.
- Introduction of Computer Assisted Personal Interviewing (CAPI) technique using handheld digital device (Tablets).
- Mobilization of local unemployed educated youth for field enumeration and supervision recruited through competitive process unlike using school teachers in the previous censuses.
- Utilization of at least 50 percent female out of the total enumerators and supervisors.
- Extensive layers of trainers were employed at different levels of training including school teachers as master trainers at the district and local levels.

- Use of pre-coded questions.
- Use of additional form for a separate study on cause of death for maternal mortality conducted by the Ministry of Health and Population.
- Use of a community questionnaire to collect basic information for all administrative wards across the country.
- Full enumeration of all types of buildings including their use.
- Use of improved cartographic GIS maps for every Enumeration Areas.
- Adoption of extensive and self participatory communication strategy.
- Special emphasis was given for GESI (Gender Equality and Social Inclusion) and participatory census; as such slogan for the census is 'My Census, My Participation'.
- Special press appeal released by rural and urban municipality associations, and federation of industry and commerce for the facilitation of census enumeration by their members.
- Establishment of a separate data processing center within the CBS premises.
- Coding and consistency of the questions were rechecked before data entry.
- Coders and data entry operators were freshly recruited through a competitive process and remunerated on key stroke basis.
- Ninety seven percent of the total cost was provided by the government from domestic resources.

2. Organizational structure of NPHC 2021

- 2.1 CBS established 7 Provincial, 87 district and 349 Local Census Offices for the management of census activities of NPHC 2021. More than one district offices were established in districts with larger population, like Kathmandu-5, Lalitpur-2, Morang-2, Jhapa-2, Sunsari-2, Rupandehi-2, Kailali-2, while a Local Census Office covered two or three rural or urban municipalities. The provincial, district and Local Census Offices were coordinated by the Population Section under the Social Statistics Division of the CBS.
- 2.2 A National Census Steering Committee (NCSC) headed by honorable Vice Chair of the National Planning Commission (NPC) was formed that consists of a member of NPC, eight Secretaries of various ministries, heads of Statistics and Population Studies Central Departments of Tribhuvan University and Director General (DG) of the CBS as Member Secretary. The Steering Committee invited subject matter specialists and other distinguished personalities in the meeting. The NCSC, as the high-level advisory committee, issued overall policy directives on census undertakings and acted as the final arbitrator in resolving any impediments to successful completion of census enumeration.
- 2.3 National Census Coordination Committee (NCCC) headed by honorable member of the NPC was formed that consists of Secretaries of the Office of Chief Minister and Council of Ministers of seven provinces, Joint-secretaries of six federal ministries, presidents of Federation of District Coordination Committee, Urban Municipality Association and Rural Municipality Association, and Deputy Director General of the CBS as Member Secretary. The committee has been instrumental for ensuring necessary facilitating coordination and cooperation at the federal, provincial and local levels in different stages of the census operation.

- 2.4 A Technical Committee headed by the DG of CBS was formed consisting of members from representative of most of the line ministries, statistics, economics and population studies professors. Representatives from some relevant development partners were also invited in the committee as necessary. The committee was mainly responsible for all the technical decisions which were later recommended to the census steering committee for final approval.
- 2.5 Six special thematic committees were formed to work on different subject areas. The six thematic committees were: a) Questionnaire Design and Data Analysis, b) Gender and Social Inclusion, c) Geographic Information and Cartography, d) Training and Publicity, e) Management Information System and Data Processing, and f) Monitoring, Evaluation and Quality Management. The thematic committees were headed by Deputy Director Generals of the CBS and comprise of members from the relevant sections of CBS and outside experts from academia and relevant ministries.
- 2.6 A Provincial Census Coordination Committee (PCCC) was formed to facilitate, coordinate and monitor census activities at the province level. The PCCC was headed by the Principal Secretary of the Office of Chief Minister and Council of Ministers and comprises of Secretaries of three provincial ministries, provincial police chief and provincial census officer as Member Secretary.
- 2.7 A District Census Coordination Committee (DCCC) headed by Chief District Officer was formed at each district consisting of members from main district level offices including the district police chief, representatives of political parties and District Census Officer as Member Secretary. The DCCC was mainly responsible for district level facilitation, monitoring, security management and coordination of census activities.
- 2.8 A Local Level Census Coordination Committee (LLCCC) headed by the Chief Administrative Officer was formed at each local level to facilitate the local census activities.
- 2.9 A Ward Census Facilitation Committee (WCFC) was formed at each ward headed by Ward Chair which was mainly responsible to provide assistance as required by enumerators and supervisors, and ensure completeness of field work.

3. Census questionnaire and other tools

Census 2021 is in fact three different kinds of censuses combined in one go. The Population Census, Building Census and Live-Stock Census are the part of Census 2021 though limited number of questions were included for the latter two topics. The following are the questionnaires and other tools related to the census 2021:

3.1 Building and Household Listing Form

The supervisors prepared a complete list of buildings and households about a month prior to the main census enumeration carried out by the enumerators. The Listing form contains questions for Building and Live-Stock Census. In addition, like in the previous censuses this form collected area of agricultural land operated by the household that was later used as a sampling frame for the Agriculture Census. All the buildings in the Enumeration Area (EA), whether they are vacant or not, were listed in the form and basic information like number of floors, year of construction, purpose of use, number of residential households, household members by sex including the other sex category, land used for agriculture, and households engaged in agriculture and livestock owned by households, residential buildings constructed with government grant, household members with bank accounts, household members with

Technical and Vocational Education or Training, and information on households who have taken loans from any cooperatives, bank and financial institutions were collected through this form.

3.2 Main Questionnaire

Unlike in the previous two censuses where sampling was used, the NPHC 2021 is a complete census and the main questionnaire was administered to all the usual resident households in the country. The questionnaire basically contains housing information and individual information part. The housing part contains questions about ownership of the housing unit, household amenities/assets used, households by female member's ownership of fixed assets (housing unit/land), non-agricultural informal enterprises operated by households and sex of main operator, deaths and causes, and details of absent members of households. The individual part of the questionnaire contains name of every member of the household, relationship to head, sex, age, date of birth, birth registration status of children aged 5 years and below, caste/ethnicity, languages (ancestors language, mother tongue and second language), religion, , country of citizenship, marital status and age at first marriage, type of disability, literacy and level of education, migration, fertility of women 15-49 years of age, employment status, occupation, industry, and living arrangement of children under the age of 18 years. Questions on literacy and level of education were asked to all persons aged 5 years and above. Similarly, questions on marital status, age at first marriage, and economic activities, occupation and industry of currently working were asked of those aged 10 years and above. For economic activities, for those who worked less than 6 months of economic work or did not do any economic work at all were asked why they did so and if they searched for any work part time or full time.

3.3 Community Questionnaire

Collecting basic socio-economic and infrastructure information from each *ward* was also part of the census operation. A separate questionnaire was administered to the *ward* chairperson or *ward* secretary by the supervisors at all the *wards*.

4. Basic concepts and reference date

4.1 Method of counting

Like in the previous censuses in Nepal, the Census 2021 also adopted “modified de jure” method in counting the population. Using this method, a person was counted at his/her usual place of residence. Usual place of residence is defined as a place where a person has been living or intends to live usually. If in any case a person cannot specify his/her usual place of residence, then the criteria of at least six months residence is considered. The permanent address or birth place or the legal migration is not considered for the purpose of census counting. A person who is absent from usual place for a short period for the purpose of treatment or pilgrimage or employment or similar reasons is treated as present in the usual place of residence. Persons away or absent from birth place or usual place for employment or study or business purpose for longer than six months' period is considered absent population and thus, not counted as present population. However, homeless or mobile population was counted at the place where they were traced on the last day of enumeration.

4.2 Reference date

The reference date for the NPHC 2021 is November 25, 2021 (Mangsir 9, 2078 BS). For questions related to death in the household, birth given by a woman of age 15 to 49 and work done by individuals, the last 12 months preceding the day of enumeration was considered as the reference period.

5. Field operation

The Building and Household Listing fieldwork was conducted by the supervisors for 20 days from September 15 to October 4, 2021 (*Bhadra 30 to Ashwin 18 of B.S. 2078*) and the main census enumeration was done by the enumerators for 15 days from November 11 to November 25, 2021 (*Kartik 25 to Mangsir 9 of B.S. 2078*). The supervisors closely supervised the main census fieldwork by the enumerators in the latter period whilst they also administered the community questionnaire from the wards assigned to them. The last day of the census enumeration was set aside for any adjustments due to newly occurred birth or death in the EA.

6. Presentation of the Census Data as Indicators in Map Form Methodology

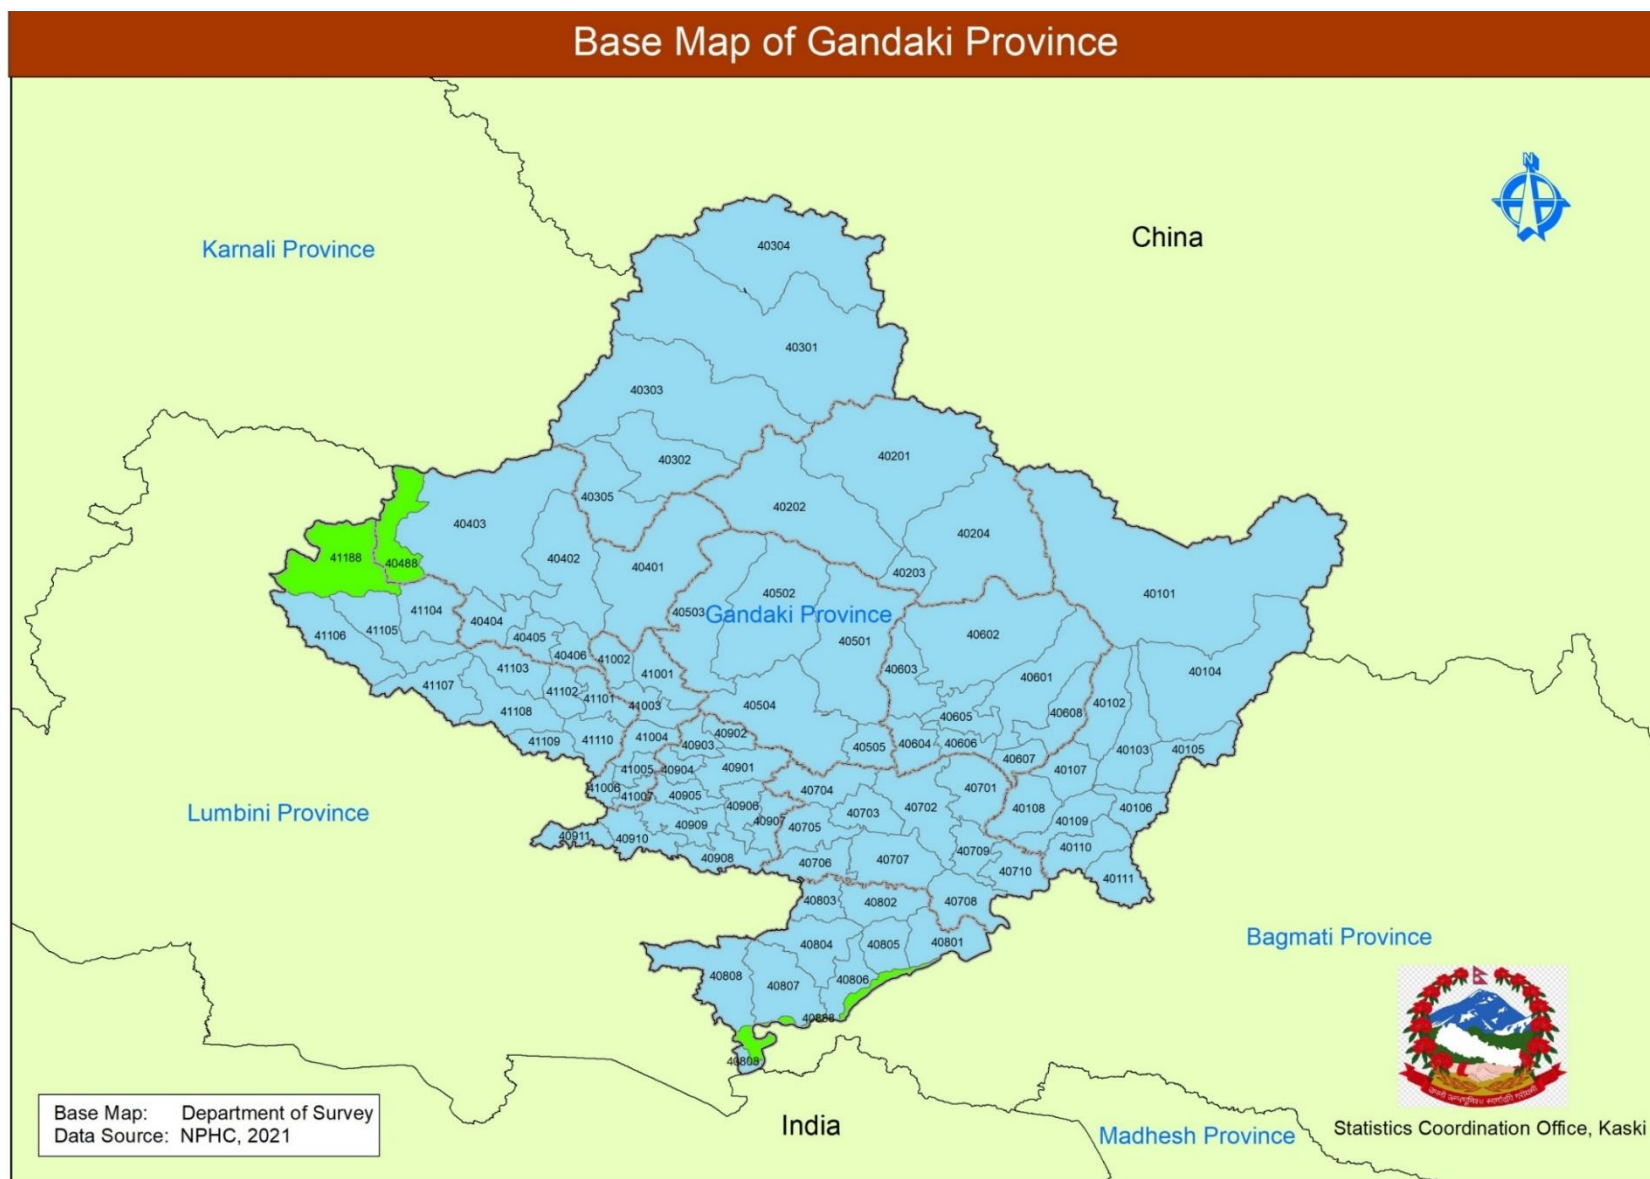

A GIS application software – the ArcGIS platform from the Environmental Systems Research Institute (ESRI) – was used to map the indicators generated through statistical computation and analysis of the census data, using the spatial data source from the Department of Survey as a base map.

The indicators were calculated at the national, provincial, and local levels as per their respective definitions and formulae. They were grouped thematically under the headings: population, economic activity, infrastructure, health and environment, education, children, and gender.

Presentation

The publication is divided into two parts. The first part introduces the national population and housing census, including the base map of Gandaki Province. The second part contains the bulk of the maps illustrating the geographical distribution of indicator values derived from the 2021 Census, organized under seven themes: population, economic activity, infrastructure, health and environment, education, children, and gender. Each indicator is presented in the form of a map, accompanied by a table showing the actual Palika-wise data values and a brief text describing the definition of the indicator and the major findings.

Population Distribution, 2021

The total population of Nepal was 29,164,578, while Gandaki Province recorded a population of 2,466,427. The population distribution across the local levels within Gandaki province is highly uneven. Pokhara Metropolitan City has the highest population among all local levels with 513,504 people, whereas Narpa Bhumi Rural Municipality has the lowest, with just 396 people. This highlights significant demographic differences between the province's urban centers and its remote rural areas.

The spatial distribution of population in Gandaki Province is illustrated through a dot map, where each dot represents 100 people. On average, there are 290.2 dots per local level (Palika). The number of dots ranges from just 2 in Narpa Bhumi to 555 in Pokhara Metropolitan City.

Proportional Distribution of Population, 2021

The proportional distribution of population is the ratio of the population of a Palika to the total population of the province and is generally expressed as a percentage. The proportional distribution of population ranged from 0.02% in Narpa Bhumi Rural Municipality to 20.82% in Pokhara Metropolitan City.

$$\text{Population Proportion} = \frac{\text{Total population of palika}}{\text{Total Population of Province}} \times 100$$

Proportional Population Distribution

2

Proportional Palikawise Distribution of Population in percent, 2021

Population Density, 2021

Population density shows how many people live in one square kilometer of land. In Gandaki Province, there were 115 people per square kilometer on average, while for all of Nepal, it was 198 people per square kilometer. The population was not spread evenly. Palika-wise the population density ranges from 0.5 person per square kilometer in Narpa Bhumi Rural Municipality to 1106 persons per square kilometer in Pokhara Metropolitan. Among eighty-five Palikas in Gandaki province thirty Palikas has the population density below the Provincial average and fifty-five had above it.

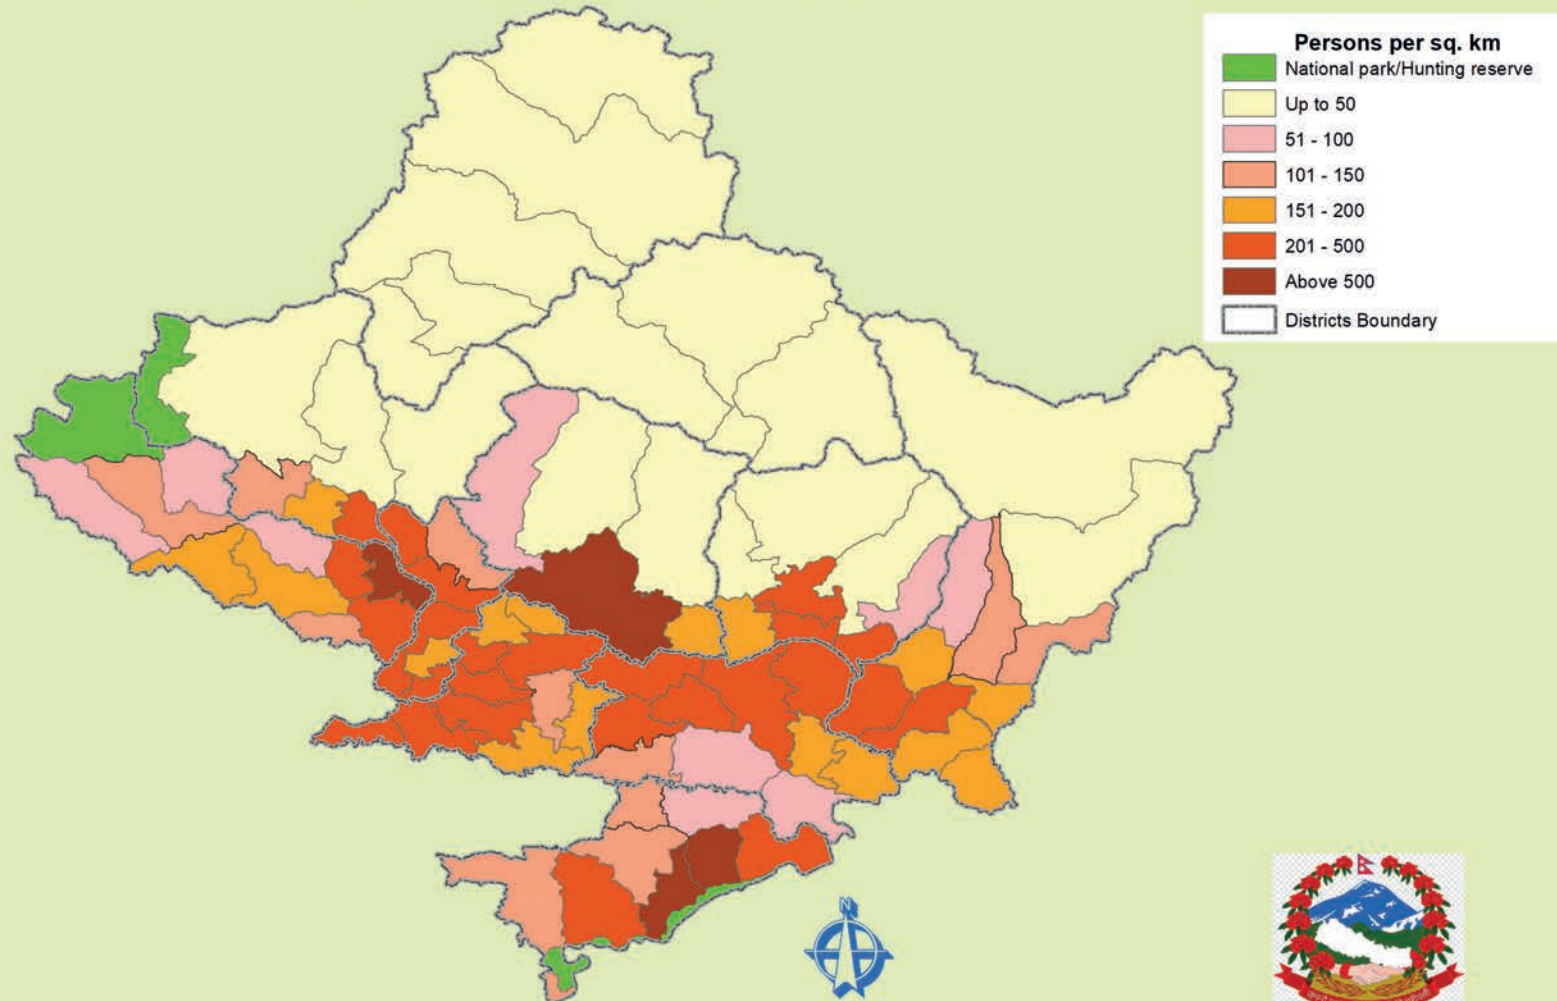

$$\text{Population Density} = \frac{\text{Total Population}}{\text{Total Area (sq. km.)}}$$

Population Growth Rate, 2021

Population growth is a fundamental demographic descriptor on which all others are either directly or indirectly contingent. It refers to the growth of the human population in a particular area during a specified period of time. In practice, the annual growth rate of a population is usually derived from 10-year census data and is expressed as a percentage. During the period 2011 to 2021, the population growth rate of Nepal was 0.92% per annum and it was 0.25% per annum in Gandaki Province. Among the 85 Palikas in Gandaki Province, Kawasoti Municipality experienced the highest growth rate (3.17%), while Rhishing Rural Municipality experienced the lowest growth rate (-3.52%) during the period. Out of eighty five Palikas, sixty six Palikas had a negative growth rate and nineteen Palikas had a positive growth rate. Eleven Palikas had an average annual growth rate greater than the national average annual growth rate (0.92%).

$$\text{population Growth Rate} = \ln \left(\frac{\text{Population of 2021}}{\text{Population of 2011}} \right) \times \frac{1}{10.42}$$

Household Distribution, 2021

The composition and distribution of households are important indicators for population planning, housing and other development activities. A household is a socioeconomic unit of people living together, either related, unrelated, or both, usually sharing a common kitchen. It may consist of a single person or a group of two or more.

In Gandaki Province, 661,632 households were recorded in the census, accounting for 9.9% of Nepal's total households. Among the eighty five Palikas in the province, Pokhara Metropolitan City had the highest number of households (140459), while Narpa Bhumi had the lowest (126).

Average Household Size, 2021

A household consists of a group of individuals who share living quarters and their principal meals. It is the basic unit and provides a general framework for the identification and enumeration of individuals in many demographic studies. Household size data is required for planning at all levels — local, Province and national. The size of a household also plays an important role in the social structure of a country and reflects the structure of society. The average household size refers to the number of persons per household.

The average household size in Gandaki Province was 3.72 compared to 4.37 for Nepal as a whole. Palika-wise it ranges from 2.82 in Varagung Muktichhetra Rural Municipality to 4.33 in Tarakhola Rural Municipality. Out of eighty five Palikas in the province, twenty seven Palikas had an average household size greater than the provincial average, while fifty eight Palikas had a lower than the provincial average.

$$\text{Average Household size} = \frac{\text{Total Population}}{\text{Total Number of Households}}$$

Sex Ratio, 2021

The sex ratio is the ratio of the number of persons of one sex to that of the other and it is one of the principal numerical measures of sex composition. It may either be expressed as the number of male per 100 female or the number of female per 100 male. Usually, the former is employed and it is the one used here. A sex ratio value above 100 indicates a greater number of male, while a value below 100 indicates a greater number of female.

The overall sex ratio of Gandaki Province was 90, which is lower than the national value of 96. Palika-wise sex ratio ranged from 74 in Narpa Bhumi to 134 in Chame. Among the eighty five Palikas, thirty had sex ratios above the provincial average and fifty five were below it.

$$\text{Sex Ratio} = \frac{\text{Male Population}}{\text{Female Population}} \times 100$$

Child Woman Ratio, 2021

The child-woman ratio is the ratio of children aged 0 to 4 years to women of reproductive age (15 to 49 years). It is a simple fertility indicator, commonly expressed as the number of children per thousand women. This ratio is often used as an index of fertility when reliable birth statistics are not available.

In Gandaki province the child woman ratio was 237.62 compared to 296.31 for Nepal as a whole. Palika-wise, the ratio varied from 141.23 in Lomanthang Rural Municipality to 429.89 in Chumanubri Rural Municipality. Among eighty five Palikas in Gandaki Province, Fifty-seven Palikas had child-woman ratios above and twenty eight Palikas below the provincial figure.

$$\text{Child Woman Ratio} = \frac{\text{Total Population of age (0 - 4)}}{\text{Female Population of age (15 - 49)}} \times 1000$$

Total Dependency Ratio, 2021

The total dependency ratio is used to study population structure. It is the ratio of the number of dependent persons (those of non-working age) per 100 persons of working age. It is defined as the ratio of the total number of people in the two age groups 0–14 years and 60 years and above per 100 persons in the age group 15–59 years.

In Gandaki Province the total dependency ratio was 59, while it was 61 for Nepal as whole. Palika-wise, it ranged from 35 in Chame Rural Municipality to 85 Dhawalagiri Rural Municipality. Sixty-four Palikas had total dependency ratios above and twenty one Palikas below the provincial figure.

$$\text{Total Dependency Ratio} = \frac{\text{Population of age (0 – 14)} + \text{Population of 60 and above}}{\text{Population of age (15 – 59)}} \times 100$$

Aged Dependency Ratio, 2021

The aged dependency ratio is an important indicator of population structure. It is defined as the number of aged persons (60 years and above) per 100 individuals in the age group 15–59 years. This indicator helps in the understanding of the situation aged population.

The aged dependency ratio in Gandaki Province was 21.3, while it was 16.5 for Nepal. Palika-wise, it ranged from 10.8 in Chame Rural Municipality to 40.7 in Dudhapokhari Rural Municipality. Twenty Palikas had child dependency ratios below and sixty-five Palikas had ratios above the provincial figure.

$$\text{Aged Dependency Ratio} = \frac{\text{Population of age 60 and above}}{\text{Total Population of age (15 – 59)}} \times 100$$

Aged Dependency Ratio

Number of people aged 60 years and above per 100 individuals in age group 15-59 years, 2021

Proportion of 75 and above population, 2021

The Proportion of elderly population is an important indicator of the state. It is the proportion of aged persons 75 years and above to the total population expressed in percentage.

In Gandaki Province, 3.29% of the total population was recorded as aged 75 and above while this figure was 2.20% for Nepal. Palika-wise, the proportion of the elderly population varied from 1.57% in Chame Rural Municipality to 6.35% in Dudhapokhari Rural Municipality. Twenty-seven Palikas had a proportion of the elderly population below and fifty-eight Palikas a proportion above the provincial figure.

$$\text{Proportion of 75 and above population} = \frac{\text{Total population of age 75 and above}}{\text{Total population of all age}} \times 100$$

Singulate Mean Age at Marriage for Male, 2021

The Singulate Mean Age at Marriage (SMAM) is the average length of single life, expressed in years, among those who marry before the age of 50. It is a synthetic indicator calculated from the marital status of men and women aged 15 to 54 at the time of a census or survey. The SMAM for males represents the average number of single years lived by ever-married males who marry before age 50.

In Gandaki Province, the singulate mean age at marriage for males was 26.26 years, while it was 25.46 years for Nepal. Palika-wise, the SMAM ranged from 23.21 years in Dhorpatan Municipality to 28.90 years in Lomanthang Rural Municipality. Fifty-two Palikas had values below and thirty-three had values above the provincial figure.

Singulate Mean Age at Marriage for Female, 2021

The Singulate Mean Age at Marriage (SMAM) is the average length of single life, expressed in year, among those who marry before the age of 50. It is a synthetic indicator calculated from the marital status of men and women aged 15 to 54 at the time of a census or survey. The SMAM for female represents the average number of single year lived by ever-married women who marry before age 50.

In Gandaki Province, the singulate mean age at marriage for female was 21.97 year, while it was 21.83 year for Nepal. Palika-wise, the SMAM ranged from 19.85 year in Kwhola Sothar Rural Municipality to 26.21 year in Lomanthang Rural Municipality. Sixty eight Palikas had values below and seventeen had values above the provincial figure.

Proportion of People in Urban Area, 2021

The proportion of the population living in urban areas is an important indicator of urbanization and development. According to the Degree of Urbanization (DeGurba) classification, urban areas are defined based on population size, density and economic functions, categorizing settlements into urban, peri-urban and rural areas.

In Gandaki Province, 26.04% of the population lives in urban areas as classified by the DeGurba system, slightly below the national figure of 27.07%. Palika-wise, the proportion of urban population ranges from 0.00% in some Rural Municipality to 58.97% in Pokhara Metropolitan City. Among the eighty five Palikas, seventy have Proportion of urban population below the provincial average and fifteen have above it.

$$\text{Proportion of people in urban area} = \frac{\text{Population living in urban area}}{\text{Total Population}} \times 100$$

Proportion of Urban population

Proportion of population living in urban area to total population in percent, 2021

Base Map: Department of Survey
Data Source: NPHC, 2021

Proportion of People in Peri Urban Area, 2021

The proportion of the population living in peri-urban areas reflects transitional zones between urban and rural settlements, often characterized by mixed land uses and rapid growth. According to the Degree of Urbanization (DeGurba) classification, peri-urban areas serve as buffers between core urban centers and rural regions.

In Gandaki Province, 23.1% of the population resides in peri-urban areas, compared to 39.74% nationally. Palika-wise, the peri-urban population proportion ranges from 0.00% in some rural municipality to 72.69% in Devchuli Municipality. Among the eighty five Palikas, sixty seven have peri-urban population Proportion below the provincial average and eighteen have above it.

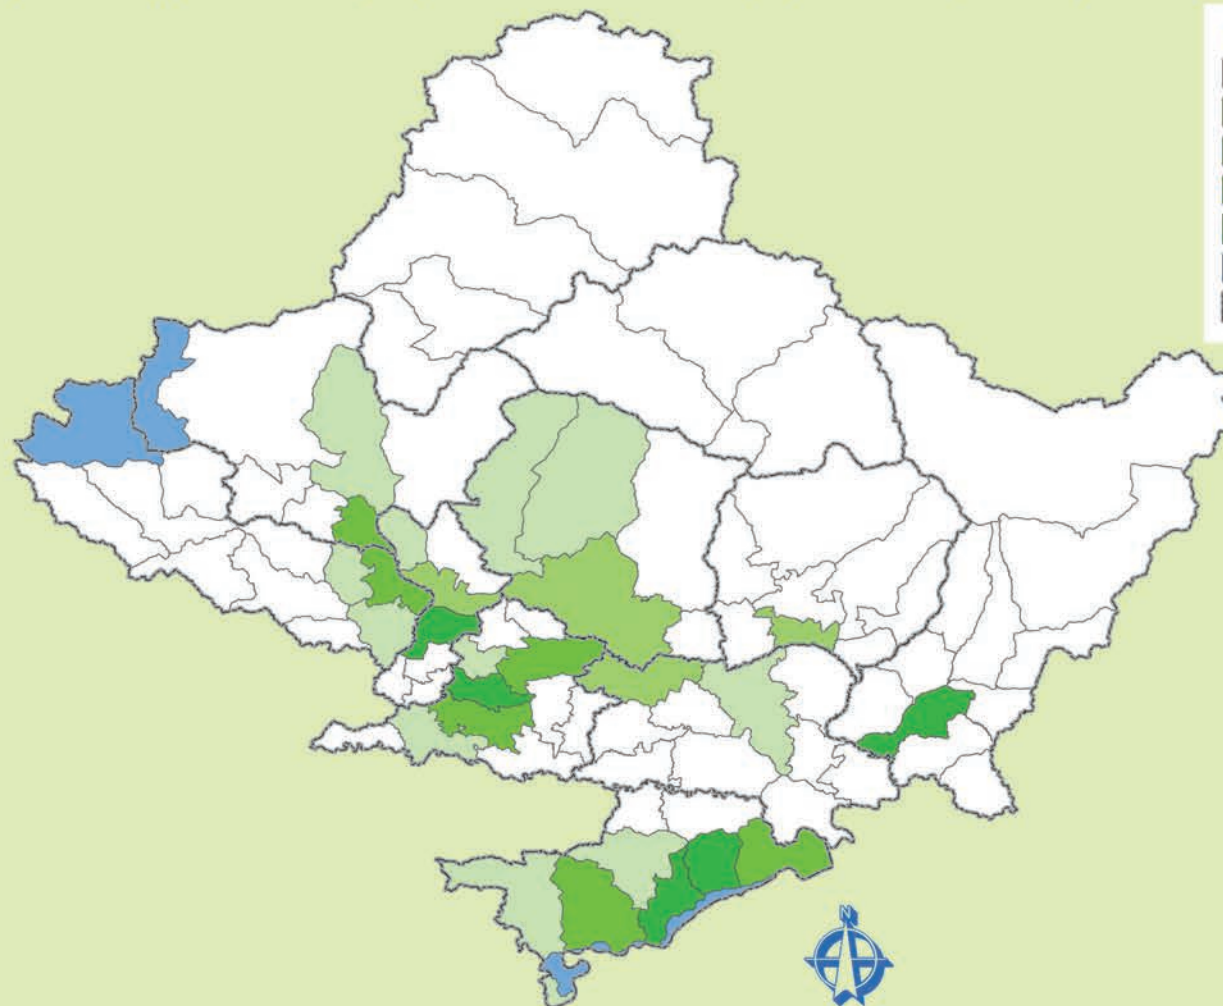

$$\text{Proportion people in peri urban area} = \frac{\text{Population living in peri urban area}}{\text{Total Population}} \times 100$$

Proportion of Peri-Urban Population

Proportion of population living in per-urban area to total population of a palika in percent, 2021

Base Map: Department of Survey
Data Source: NPHC, 2021

Statistics Coordination Office, Kaski

Proportion of People in Rural Area, 2021

The proportion of the population living in rural areas is a key indicator reflecting settlement patterns, livelihood sources and development needs. According to the Degree of Urbanization (DeGurba) classification, rural areas are defined as settlements with low population density and predominantly agricultural or non-urban economic activities.

In Gandaki Province, 50.85% of the population lives in rural areas, higher than the national figure of 33.19%. Palika-wise, the rural population proportion ranges from 0.00% in Kawasoti Municipality (fully urban) to 100.00% in many Rural Municipality. Among the eighty five Palikas, sixteen have rural population Proportion below the provincial average and sixty nine have above it.

$$\text{Proportion people in rural area} = \frac{\text{Population living in rural area}}{\text{Total Population}} \times 100$$

Proportion of Rural Population

Proportion of population living in rural area to total population of palika in percent, 2021

Absent Population Abroad as Percentage of Total Population, 2021

The person who had been absent abroad (out of the country) for more than six months at the time of enumeration was defined as the absentee population (abroad). The absentee population was not included in the total population. The percentage of persons absent to destinations abroad is an index that provides an indication of out-migration and the mobility of the population.

In Gandaki Province, the absentee population abroad constituted 11.62% of the total population, while it was 7.51% for the nation. Palika-wise, the share varied from 3.15% in Thasang Rural Municipality to 26.55% in Lo Ghekar Damodarkunda Rural Municipality. Forty-four Palikas had absentee populations below and forty one Palikas had populations above the provincial figure.

$$\text{Percentage of Absent (abroad)} = \frac{\text{Absent Population (Abroad)}}{\text{Total population}} \times 100$$

Absent population abroad as percentage of total population

Proportion of Absent Within Country, 2021

The proportion of the total population of a Palika who had been absent from the household (within country) for more than six months at the time of enumeration was defined as the absentee population (within country). The absentee population was not enumerated in the household they are enumerated in their usual place of residence. The proportion of persons absent from the household within country is an indication of the mobility of the population for work and education.

In Gandaki Province, the absentee population within country is constituted 14.71% of the total population, while it was 7.77% for the nation. Palika-wise, the proportion varied from 4.66% in Pokhara Metropolitan City to 50.73% in Bhimsenthapa Rural Municipality. Thirty Palikas had absentee populations below and fifty-five Palikas had populations above the provincial figure.

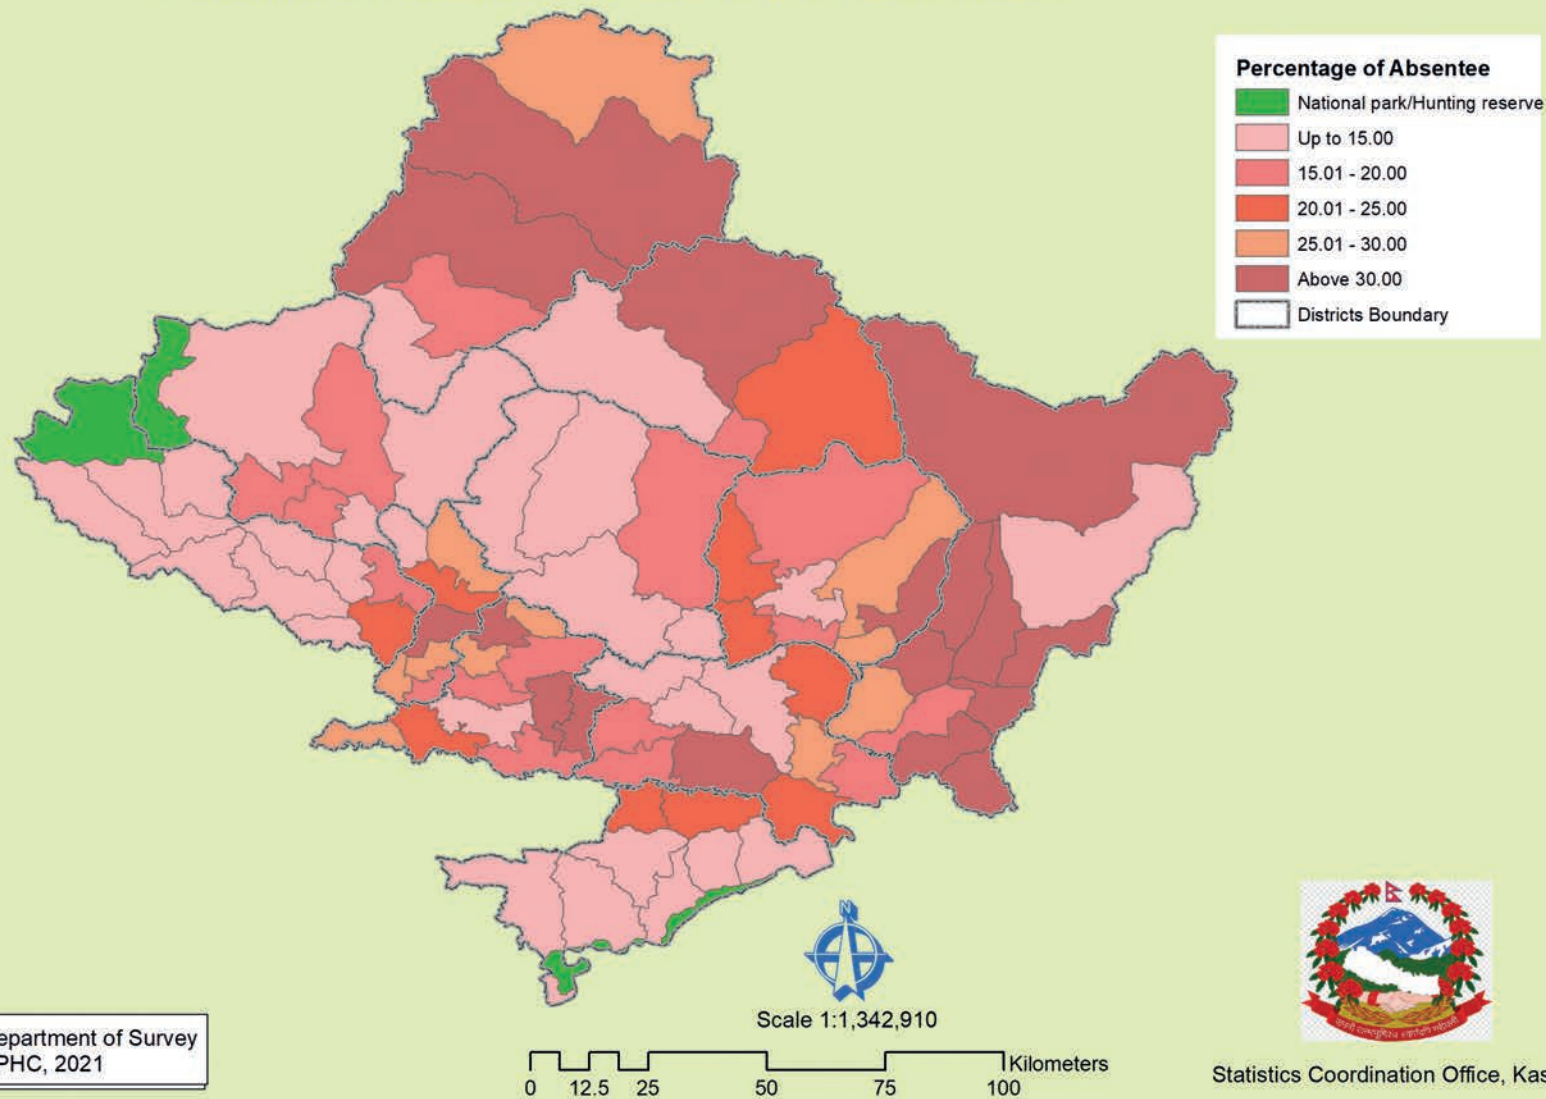

$$\text{Proportion of Absent (within country)} = \frac{\text{Absent Population (within country)}}{\text{Total population}} \times 100$$

Absentee Population (within country)

Proportion of absentee population (with in country), 2021

Wealth Quintile Distribution, 2021

The wealth quintile is a composite indicator of household living standards, derived from household ownership of selected assets, housing characteristics, and access to essential services. In the 2021 Population and Housing Census, the wealth quintile was constructed based on household housing characteristics and the facilities available for their use. Households were then categorized into five equal groups (quintiles), ranging from the poorest (lowest quintile) to the richest (highest quintile).

The proportion of persons in the lowest wealth quintile reflects the percentage of individuals living in the bottom 20% of the wealth distribution, offering valuable insights into poverty, socio-economic inequality, and household vulnerability within a region.

In Gandaki Province, 11.34% of the population falls into the lowest wealth quintile. Similarly, 20.12% of the population falls under the poorer quintile, 20.09% in the middle quintile, 20.63% in the richer quintile, and 27.83% in the richest quintile.

At the Palika level, Lomanthang Rural Municipality recorded the highest proportion of population in the poorest quintile at 76.01%, while Pokhara Metropolitan City had the highest share of population in the richest quintile, at 60.53%.

$$\text{Proportion of Population in Wealth Quintile} = \frac{\text{Population in the wealth quintile}}{\text{Total Population}} \times 100$$

Native Born Population, 2021

The proportion of native-born population refers to the ratio of individuals born within the same Palika (native Palika) to the total population, expressed as a percentage. This indicator provides insight into internal mobility, population stability and community rootedness.

In Gandaki Province, 65.83% of the population is native-born, compared to the national average of 68.98%. Palika-wise, the proportion ranges from 38.01% in Chame Rural Municipality to 99.07% in Dharche Rural Municipality. Among the eighty-five Palikas in Gandaki Province, fourteen have Proportion below the provincial average, while seventy-one have Proportion above it.

$$\text{Proportion of Native Born Population} = \frac{\text{Individulas Born Within Same Palika}}{\text{Total Population}} \times 100$$

The total population of the local levels does not match the provincial total as institutional populations are not included in the local level population figures.

Proportion of Native born population

Ratio of individuals born within the same palika (native palika) to the total population, 2021

Internal Migrants Population, 2021

The proportion of internal migrant population refers to the ratio of individuals born in a different Palika (other than their current place of enumeration within Nepal) to the total population, expressed as a percentage. This indicator reflects the extent of internal migration and population mobility within the country.

In Gandaki Province, 32.35% of the population are internal migrants, which is higher than the national average of 28.47%. Palika-wise, the proportion ranges from 0.88% in Dharche Rural Municipality to 61.29% in Chame Rural Municipality. Among the eighty-five Palikas in Gandaki Province, sixty-nine have Proportion below the provincial average, while sixteen are above it.

$$\text{Proportion of Internal Migrants} = \frac{\text{Individulas Born in Different Palika}}{\text{Total Population}} \times 100$$

Foreign Born Population, 2021

The proportion of foreign-born population is an indicator of international migration and demographic diversity within a population. It is defined as the ratio of the total number of people born outside Nepal to the total population and is expressed as a percentage.

In Gandaki Province, the proportion of foreign-born population is 1.70%, which is lower than the national figure of 2.52%. Palika-wise, the proportion ranges from 0.00% in Lomanthang Rural Municipality to 3.83% in Devchuli Municipality. Among the eighty-five Palikas in Gandaki Province, seventy-six have Proportion below the provincial average, while nine have Proportion at or above it.

$$\text{Proportion of Foreign Born Population} = \frac{\text{Individulas Born Outside Nepal}}{\text{Total Population}} \times 100$$

Nuclear Family, 2021

Family structure is an important social indicator that reflects the composition and living arrangements within households. Among various family types, the nuclear family—defined by the United Nations as a household consisting of single member household or two parents (usually a married couple) and their dependent children living together as a single unit—represents a fundamental social unit. This structure excludes extended relatives or other unrelated members living in the same household.

In Gandaki Province, the proportion of households with a nuclear family structure is 50.12%, slightly higher than the national figure of 46.58%. Palika-wise, this proportion ranges from 36.63% in Bulintar Rural Municipality to 74.95% in Chumanubri Rural Municipality. Among the eighty-five Palikas in the province, forty-nine have Proportion below the provincial average, while the rest are above it.

$$\text{Proportion of Nuclear Family} = \frac{\text{Number of Nuclear Family Households}}{\text{Total Households}} \times 100$$

Extended Family, 2021

An extended family consists of multiple generations living together, including parents, children, grandparents and other relatives within the same household. This family structure often reflects traditional social systems, providing mutual support and shared responsibilities among family members.

In Gandaki Province, 49.88% of households live in an extended family structure, slightly lower than the national figure of 53.42%. Palika-wise, the proportion ranges from 25.05% in Chumanubri Rural Municipality to 63.37% in Bulintar Rural Municipality. Among the eighty-five Palikas, thirty-six have Proportion below the provincial average, while the remainder have Proportion above it. The prevalence of extended families highlights cultural continuity and the role of kinship networks in social and economic life within the province.

$$\text{Proportion of Extended Family} = \frac{\text{Number of Extended Family Households}}{\text{Total Households}} \times 100$$

Female Household Head, 2021

The proportion of households headed by females is the ratio of the number of households with a female head to the total number of households, expressed as a percentage.

In Gandaki Province, 41.01% of households are headed by females, which is higher than the national figure of 31.56%. Palika-wise, this proportion ranges from 23.87% in Gharpajhong Rural Municipality to 50.95% in Byas Municipality. Among the eighty-five Palikas, fifty-four have Proportion below the provincial average, while the remaining Palikas have Proportion above it.

$$\text{Proportion Female Household Head} = \frac{\text{Number of Female Households Heads}}{\text{Total Household}} \times 100$$

Total Usually Economically Active Ratio, 2021

The economic activity ratio is defined as the ratio of the usually economically active population to the total population. In the 2021 census the usually economically active population was defined as those persons who had worked or who had sought employment for a total of at least six months (at a single stretch or at intervals) during the 12 months period immediately preceding the census enumeration. The usually economically active ratio is expressed in the census as the percentage of usually economically active persons aged 10 years and above to the total population of corresponding age.

In Gandaki Province 47.08 percentage person of age 10 years and above were usually economically active, which was 46.07 for Nepal. Palika-wise the usually economically active rate ranged from 33.31% in Phalebas Municipality to 83.0 % in Varagung Muktichhetra Rural Municipality. Thirty-one Palikas had a usually economically active ratio below and fifty-four Palikas had rate above the provincial figure.

$$\text{Total Usually Economically Active Ratio} = \frac{\text{Usually economically active population}}{\text{Total Population of age 10 years and above}} \times 100$$

Female Usually Economically Active Ratio

3

Percentage of usually economically active female aged 10 years and above, 2021

Usually Economically Active Female to Male Ratio, 2021

The ratio of usually economically active females to males (aged 10 years and above) highlights gender disparity in economic participation and emphasizes female activity, as male participation tends to be relatively uniform throughout.

In Gandaki Province, this ratio was 88.38%, while it was 71.29% for Nepal. A female-to-male usually economically active ratio of 88.38 means there were 88 usually economically active females for every 100 usually economically active males in the population. Palika-wise, the ratio ranged from 59.28% in Chame Rural Municipality to 121.66% in Ghiring Rural Municipality. Nineteen Palikas had a female-to-male ratio of economically active population below the provincial figure, while sixty-six Palikas had a ratio above it.

$$\text{Usually Economically Active Female to male Ratio} = \frac{\text{Usually Economically Active Female aged 10 year and above}}{\text{Usually Economically Active Male aged 10 year and above}} \times 100$$

Usually Economically Active Female to Male Aged (15-24) Ratio, 2021

The contribution of young people (15 to 24 years) plays a significant role in the economic development of the nation. The female to male ratio of the usually economically active population in this age group indicates the gender disparity in economic participation at this stage of life.

In Gandaki Province, this ratio was 88.38%, while it was 71.29% for Nepal. Palika-wise, the ratio ranged from 69.35% in Narpa Bhumi Rural Municipality to 171.43% in Thasang Rural Municipality. Twenty eight Palikas had a female to male ratio of usually economically active youth population below the provincial figure, while fifty seven Palikas had a ratio above it.

$$\text{Usually Economically Active Female to male (15 – 24)Ratio} = \frac{\text{Usually Economically Active Female aged 15 – 24 years}}{\text{Usually Economically Active Male aged 15 – 24 years}} \times 100$$

Ratio of Female to Male Usually Economically Active Youth Population**5**

Ratio of usually economically active female to usually economically active male in the population age group 15-24 Years , 2021

Ratio of Person in Non-agriculture to Agriculture, 2021

Adult economic activity was classified as either agricultural or non-agricultural/industrial and the ratio of the number of adults (aged 15 and above) employed in non-agricultural sectors to the number employed in the agricultural sector (in the same age group) was calculated. The agricultural sector includes agriculture, forestry and fishing, while the non-agricultural sector includes mining, manufacturing and recycling, power generation, water supply, construction, trade, tourism, transport, communication, banking, real estate, public administration, education, health, employment in private households and foreign employment.

In Gandaki Province, this ratio was 72.28%, while it was 74.42% for Nepal. Palika-wise, the ratio ranged from 14.92% in Chumanubri Rural Municipality to 353.30% in Chame Rural Municipality. Sixty seven Palikas had a ratio below the provincial figure, while eighteen Palikas had a ratio above it.

Ratio of Non-agricultural to Agricultural Activity

Ratio of adults aged (15+ year) engaged usually in non-agricultural activities to those engaged in agricultural activities, 2021

Proportion of Households with Agriculture Land, 2021

Ownership of agricultural land was a key indicator of rural livelihood, food security and economic activity. According to the Population and Housing Census 2021, households owning at least 4 anna or 8 dhur of land were classified as having agricultural land.

In Gandaki Province, 58.3% of households owned agricultural land, closely matching the national proportion of 58.7%. Palika-wise, this proportion ranged from 22.86% in Pokhara Metropolitan City to 94.21% in Narpa Bhumi Rural Municipality. Among the 85 Palikas, seventeen had Proportion below the provincial average, while sixty-eight had Proportion above it.

$$\text{Proportion of households with agricultural land} = \frac{\text{Number of households with agricultural land}}{\text{Total number of households}} \times 100$$

Households with Outstanding Loans

The proportion of households with outstanding loans from banks, financial institutions and cooperatives is an important indicator of access to credit services and financial inclusion. It reflects the prevalence of borrowing practices and the availability of formal financial services within a community.

This proportion is defined as the ratio of households having outstanding loans from banks, financial institutions and cooperatives to the total number of households. In Gandaki Province, 25.23% of households had outstanding loans, while this proportion was 25.59% for Nepal as a whole. Palika-wise, the proportion ranged from 0.62% in Lomanthang Rural Municipality to 48.09% in Varagung Muktichhetra Rural Municipality. Among the eighty five Palikas, fifty four Palikas had this proportion below the provincial average, while thirty one Palikas had Proportion above it.

$$\text{Proportion of households with outstanding loans} = \frac{\text{Number of households with outstanding loans}}{\text{Total number of households}} \times 100$$

Proportion of Households Received Grants for Residential Building, 2021

Government grants for residential building construction are an important indicator of state support for disaster-affected, deprived and marginalized communities. These grants contribute to housing recovery, livelihood security and social protection.

This proportion is defined as the ratio of households that received government grants for constructing residential buildings to the total number of households. In Gandaki Province, 14.70% of households had received such grants, compared to 10.27% for Nepal as a whole. Palika-wise, the proportion ranged from 1.65% in Narpa Bhumi Rural Municipality to 88.18% in Barpak Sulikot Rural Municipality.

$$\text{Proportion of households received grants} = \frac{\text{Number of households received grants}}{\text{Total number of households}} \times 100$$

Saving Account on Bank and Financial Institutions, 2021

Access to formal financial services is a key indicator of economic inclusion, financial security and household-level saving habits. The proportion of households with at least one member holding an account in a bank or financial institution reflects the reach of financial services within the population.

This proportion is defined as the ratio of households with at least one member having an account in a bank or financial institution to the total number of households. In Gandaki Province, 72.40% of households had at least one member with a bank or financial institution account, compared to 61.89% for Nepal as a whole. Palika-wise, the proportion ranged from 31.72% in Chumanubri Rural Municipality to 93.57% in Chame Rural Municipality. Among the 85 Palikas in Gandaki Province, forty-two Palikas had Proportion below the provincial average, while forty-three Palikas had Proportion above it.

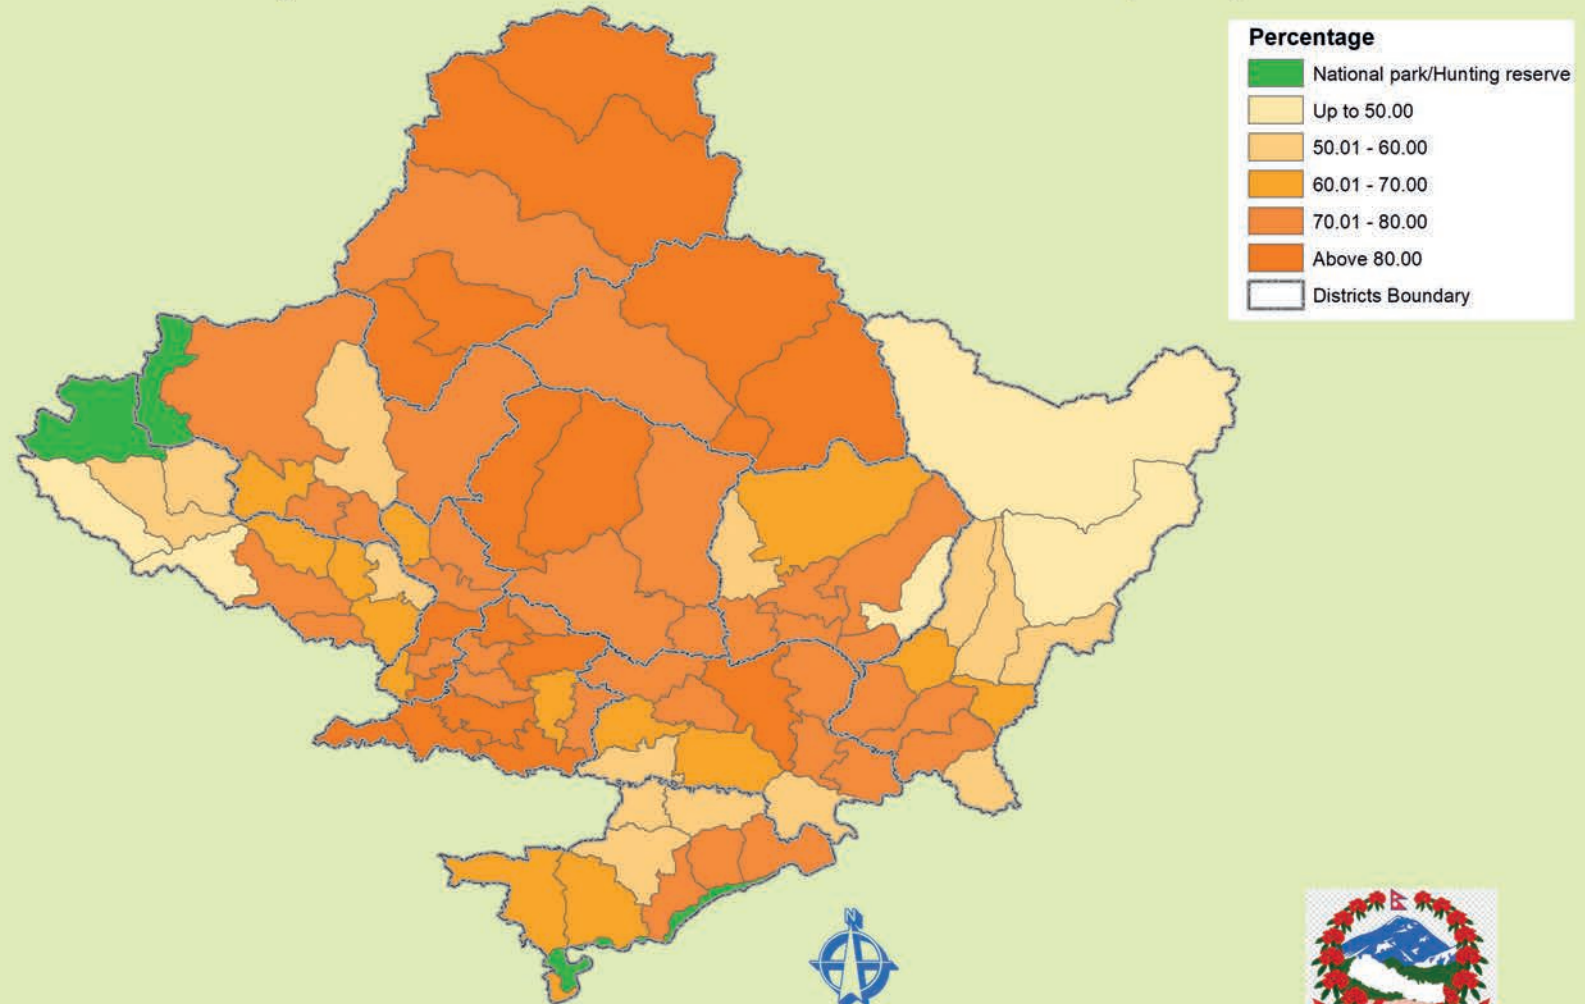

$$\text{Proportion of households with at least one saving account} = \frac{\text{Number of households with at least one saving account}}{\text{Total number of households}} \times 100$$

Households with Vocational and Technical Training, 2021

Access to vocational and technical skills is an important indicator of human capital development and employment potential within a population. It reflects opportunities for income generation, entrepreneurship and skilled labor participation. The proportion of households with at least one trained person is defined as the ratio of households with at least one member who has received vocational or technical training in the past to the total number of households. In Gandaki Province, 13.74% of households had at least one member with such training, compared to 12.55% for Nepal. Palika-wise, this proportion ranged from 4.68% in Barpak Sulikot Rural Municipality to 57.07% in Chame Rural Municipality. Among the 85 Palikas in Gandaki Province, forty-nine Palikas had Proportion below the provincial average, while thirty-six Palikas had Proportion above it.

$$\text{Proportion of households with at least one trained person} = \frac{\text{Number of households with at least one trained person}}{\text{Total number of households}} \times 100$$

Households Operating Small Scale Non-Agriculture, 2021

Small-scale non-agricultural economic activity refers to those income-generating activities operated by households for their own economic benefit, which are not registered with any government or non-government organization. These activities involve the use of household resources, with investment in cash or materials, and typically employ household members rather than regular hired labor. The products generated from such activities may be either for sale or for home use in the case of goods, while service-oriented activities are required to be provided for sale to be classified under this category. The 2021 Population and Housing Census collected information on various categories of small-scale non-agricultural activities, including manufacturing, trade or business, transport, services, and other types of economic activities. The proportion of households involved in each category reflects the economic structure, enterprise practices, and livelihood diversification at the household level within the province.

In Gandaki Province, 8.97 percent of total households reported operating some form of small-scale non-agricultural economic activity. Among these, the highest proportion was engaged in trade-related activities, accounting for 51.58 percent of such households. This was followed by manufacturing activities, which represented 23.83 percent. The remaining households were involved in other sectors such as transport, services, and other activities.

Small-scale Non-agricultural Trading Activity of Households

12

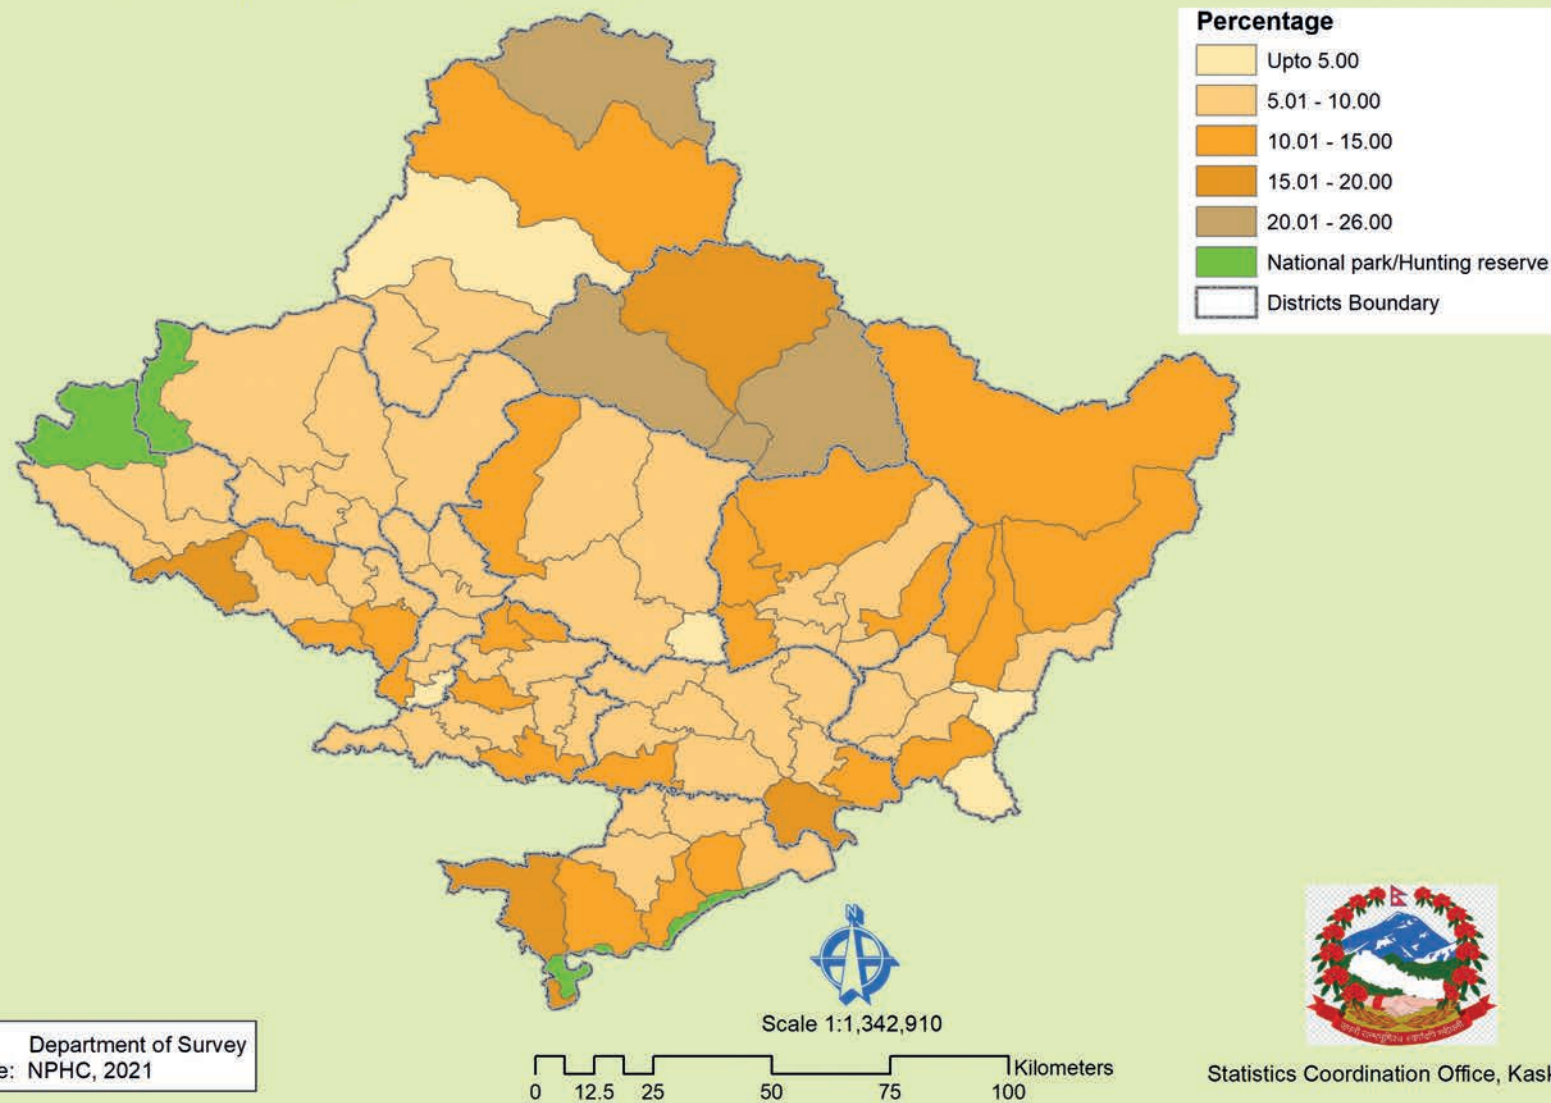

Ratio of households operating trading activity to the total households operating any small-scale non-agricultural activity, 2021

Small-Scale Non-Agricultural Activities Operated by Households

12

Ratio of households operating small-scale non-agricultural activities to total Households in Percent, 2021

Economically Active Population in Agriculture, 2021

This indicator reflects the share of the economically active population (aged 10 years and above) who were mainly engaged in agricultural activities during the census reference period. In Gandaki Province, 57.55% of the economically active population worked mainly in agriculture, which is slightly higher than the national figure of 57.31%.

Palika-wise, the proportion ranged from 22.12% in Chame Rural Municipality to 86.54% in Biruwa Rural Municipality. Among the eighty-five Palikas, eighteen had Proportion below the provincial average, while sixty-seven were above it.

$$\text{Proportion of Population Active in Agriculture} = \frac{\text{Population of age 10 years and above in Agriculture}}{\text{Population of age 10 years and above}} \times 100$$

Male Economic Activity in Agriculture

14

Proportion of male population spending more time in agricultural economic activity, age 10 years and above in percent, 2021

Economically Active Female in Agriculture, 2021

This indicator represents the percentage of economically active females (aged 10 years and above) whose main activity during the census reference period was working in agriculture.

In Gandaki Province, 64.69% of economically active females were primarily engaged in agriculture, closely matching the national figure of 64.77%.

Palika-wise, the proportion ranged from 31.58% in Pokhara Metropolitan City to 89.95% in Biruwa Rural Municipality. Among the eighty-five Palikas, twenty had Proportion below the provincial average, while sixty-five had Proportion above it.

$$\text{Proportion of Female Population Active in Agriculture} = \frac{\text{Female Population of age 10 years and above in Agriculture}}{\text{Total Female of age 10 years and above}} \times 100$$

Proportion of Households with Access to Improved Fuel for Cooking, 2021

Access to improved cooking fuel is a key indicator of household living standards, environmental health and indoor air quality. The use of cleaner fuels reduces health risks associated with indoor smoke and contributes to environmental conservation. In this analysis, electricity, LPG and biogas were considered as improved fuels for cooking. The proportion was calculated as the ratio of households using improved fuel to the total number of households. In Gandaki Province, this proportion was 52.74%, compared to 45.95% for Nepal as a whole. Palika-wise, the proportion ranged from 3.17% in Narpa Bhumi Rural Municipality to 91.48% in Pokhara Metropolitan City. Among the 85 Palikas, sixty-nine Palikas had Proportion below the provincial average, while sixteen Palikas had Proportion above it.

$$\text{Proportion of households using improved fuel for cooking} = \frac{\text{Number of households using improved fuel for cooking}}{\text{Total number of households}} \times 100$$

Proportion of Households Using improved Fuel for Cooking

1

Proportion of households using improved cooking fuel to total households, 2021

Access to Clean Drinking Water, 2021

Access to clean drinking water is a vital indicator of sustainable development, public health and quality of life. Safe and adequate drinking water reduces the risk of waterborne diseases and contributes to the overall wellbeing of the population. In this context, water supplied through taps, covered wells, tubewells and jars is considered a source of clean drinking water. The proportion of households with access to clean drinking water is defined as the ratio of households using these sources as their main source of drinking water to the total number of households. In Gandaki Province, 90.92% of households had access to clean drinking water, compared to 92.90% for Nepal as a whole. Palika-wise, this proportion ranged from 51.99% in Gorkha Municipality to 99.74% in Chame Rural Municipality. Among the 85 Palikas in Gandaki Province, thirty-four Palikas had Proportion below the provincial average, while fifty-one Palikas had Proportion above it.

$$\text{Proportion of households with access to clean drinking water} = \frac{\text{Number of households with access to clean drinking water}}{\text{Total number of households}} \times 100$$

Proportion of Households with Access to Clean Drinking Water

2

Proportion of households with access to clean drinking water to total households, 2021

Access to Improved Toilet Facilities, 2021

Access to improved sanitation is a crucial indicator of public health, hygiene and living standards. It reflects not only the availability of essential infrastructure but also the quality of life and the overall wellbeing of the population. In Gandaki Province, 78.64% of households were using improved toilet facilities, compared to 64.88% for Nepal as a whole. Households using flush toilet facilities were classified as having access to improved toilet services. Palika-wise, this proportion ranged from 5.64% in Mahashila Rural Municipality to 96.55% in Marshyangdi Rural Municipality. Among the 85 Palikas in Gandaki Province, forty-one Palikas had a proportion of households with improved toilet facilities below the provincial average, while forty-four Palikas had a proportion above it.

$$\text{Proportion of households with access to improved toilet facility} = \frac{\text{Proportion of households with access to improved toilet facility}}{\text{Total number of households}} \times 100$$

Proportion of Households with Access to Improved Toilet Facility

3

Proportion of households with access to improved toilet facility to total households, 2021

Improved Lighting Facility, 2021

Among the major sources of fuel used for lighting purposes, electricity and solar energy are considered improved sources. The proportion of households with access to improved lighting facilities is defined as the ratio of households using either electricity or solar as the main source of fuel for lighting to the total number of households. In Gandaki Province, 99.51% of households use improved lighting sources, compared to 98.76% for Nepal as a whole. Palika-wise, this proportion ranges from 95.31% in Dhawalagiri Rural Municipality to 100% in Chame Rural Municipality. Among the 85 Palikas, forty have Proportion below the provincial figure, while forty-five have Proportion above it.

$$\text{Proportion of households with access to improved lighting facility} = \frac{\text{Proportion of households with access to improved lighting facility}}{\text{Total number of households}} \times 100$$

Prevalence of Disability, 2021

The prevalence of disability is an important demographic and social indicator reflecting the proportion of the population living with functional limitations. It helps assess the inclusiveness of services, accessibility and welfare provisions for persons with disabilities within a Region/Palika.

In Gandaki Province, 2.93% of the total population was recorded as having some form of disability, compared to 2.22% for Nepal as a whole. Palika-wise, the prevalence of disability ranged from 1.74% in Pokhara Metropolitan City to 6.82% in Narpa Bhumi Rural Municipality. Among the eighty-five Palikas in Gandaki Province, twenty-five had prevalence rates below the provincial average, while sixty had rates above it.

$$\text{Prevalence of Disability} = \frac{\text{Population with atleast one kinds of disability}}{\text{Total Population}} \times 100$$

Total Literacy Rate, 2021

According to the Population and Housing Census 2021, a literate person is defined as a person aged 5 years and above who can read, write and perform simple mathematical calculations independently. This definition has been consistently applied in all previous censuses of Nepal. The literacy rate is calculated as the proportion of the literate population (aged 5 years and above) to the total population of the same age group, expressed as a percentage.

In Gandaki Province, the total literacy rate is 81.65%, compared to 76.25% for Nepal as a whole. Palika-wise, the literacy rate ranges from 39.16% in Chumanubri Rural Municipality to 88.72% in Pokhara Metropolitan City. Among the 85 Palikas, sixty-five have literacy rates below the provincial average, while twenty have rates above it.

$$\text{Total Literacy Rate} = \frac{\text{Number of persons aged 5 years and above who can read and write}}{\text{Total population of age 5 years and above}} \times 100$$

The total population of the local levels does not match the provincial total as institutional populations are not included in the local level population figures.

Adult Total Literacy Rate

Ratio of literate population aged 15 years and above to the total population of the same age group in percent, 2021

Adult Male Literacy, 2021

According to the Population and Housing Census 2021, the male adult literacy rate is defined as the proportion of the total literate male population aged 15 years and above to the total male population in the same age group, expressed as a percentage.

In Gandaki Province, the male adult literacy rate is 86.61%, compared to 80.57% for Nepal as a whole. Palika-wise, the literacy rate ranges from 43.82% in Chumanubri Rural Municipality to 93.35% in Pokhara Metropolitan City. Among the eighty-five Palikas in Gandaki Province, sixty-four have male adult literacy rates below the provincial average, while twenty-one have rates above it.

$$\text{Adult Male Literacy Rate} = \frac{\text{Literate male of age 15 years and above}}{\text{Total male of age 15 years and above}} \times 100$$

Adult Female Literacy Rate

Proportion of the total literate female population aged 15 years and above to the total female population in the same age group, 2021

Prime Age Total Literacy, 2021

The total literacy rate of the prime age group (15–24 years) is an important indicator of youth education attainment and reflects the recent performance of educational systems, as most individuals in this age range would have completed basic education.

According to the Population and Housing Census 2021, the total literacy rate for the prime age group in Gandaki Province is 98.60%, compared to 93.81% for Nepal as a whole. Palika-wise, this proportion ranges from 69.67% in Chumanubri Rural Municipality to 100.00% in Narpa Bhumi Rural Municipality. Among the eighty-five Palikas in Gandaki Province, thirty-eight have rates below the provincial average, while forty-seven have rates at or above it.

$$\text{Prime Age Total Literacy Rate} = \frac{\text{Literate persons of age (15 – 24) years}}{\text{Total persons of age (15 – 24) years}} \times 100$$

Prime Age Male Literacy Rate

Proportion of male literate population of prime age 15-24 years to the total population in the same age group in percent, 2021

Prime Age Female Literacy, 2021

The female literacy rate of the prime age group (15–24 years) is a crucial indicator of gender equality in education and reflects the educational opportunities available to young women in recent years.

According to the Population and Housing Census 2021, the female literacy rate for the prime age group in Gandaki Province is 98.53%, compared to 92.52% for Nepal as a whole. Palika-wise, this proportion ranges from 62.63% in Chumanubri Rural Municipality to 100.00% in Narpa Bhumi Rural Municipality. Among the eighty-five Palikas in Gandaki Province, forty-three have female literacy rates below the provincial average, while forty-two have rates at or above it.

$$\text{Prime Age female Literacy Rate} = \frac{\text{Literate female of age (15 – 24) years}}{\text{Total female of age (15 – 24) years}} \times 100$$

Prime Age female Literacy Rate

Proportion of female literate population of prime age 15-24 years to the total population in the same age group in percent, 2021

Ratio of Literate Female to Male in Prime Age, 2021

The ratio of literate females to males in the prime age group (15–24 years), expressed as a percentage, is an important measure of gender parity in literacy among youth. A value over 100 indicates a higher number of literate females than males in that age group.

According to the Population and Housing Census 2021, this ratio in Gandaki Province is 105.64%, compared to 102.72% for Nepal as a whole. Palika-wise, it ranges from 72.17% in Manang Ngisyang Rural Municipality to 126.31% in Bhimsenthapa Rural Municipality. Among the eighty-five Palikas in Gandaki Province, twenty-nine have ratios below the provincial average, while fifty-six have ratios at or above it.

$$\text{Ratio of literate female to male of prime age} = \frac{\text{Literate female of age (15 – 24) years}}{\text{Literate male of age (15 – 24) years}} \times 100$$

The total population of the local levels does not match the provincial total as institutional populations are not included in the local level population figures.

Proportion of Population Ever Attending School/College

Proportion of population aged 5–25 years who have attended school/college at some point in the past, 2021

Proportion of School Never Attending Population Aged (5–25) Years, 2021

This indicator reflects the share of the population aged 5–25 years who have never enrolled in any school. According to the Population and Housing Census 2021, in Gandaki Province, 1.85% of the population aged 5–25 years had never attended school, compared to 8.08% for Nepal as a whole. Palika-wise, the proportion ranged from 0.79% in Phedikhola Rural Municipality to 25.11% in Chumanubri Rural Municipality. Among the eighty-five Palikas in Gandaki Province, forty-five had Proportion below the provincial average, while forty were above it.

$$\text{Proportion of School Never attending Population in (5 – 25)} = \frac{\text{School Never attending persons of age (5 – 25) years}}{\text{Total Population of age (5 – 25) Years}} \times 100$$

Proportion of School Never Attending Female Aged (5–25), 2021

This indicator measures the percentage of females aged 5–25 years who have never enrolled in or attended any formal educational institution. It highlights gender-specific educational exclusion and helps track progress in educational access for young women and girls. In Gandaki Province, 1.98% of females aged 5–25 years had never attended school, compared to 9.45% for Nepal. Palika-wise, the proportion ranged from 0.60% in Tarakhola Rural Municipality to 28.77% in Chumanubri Rural Municipality. Among the eighty-five Palikas, fifty-one had Proportion below the provincial average, while thirty-four were above it.

$$\text{Proportion of School Never Attending Female in (5 – 25)} = \frac{\text{School Never attending female of age(5 – 25)years}}{\text{Total female of age(5 – 25)Years}} \times 100$$

Child Economic Activity, 2021

The child economic activity rate is the proportion of children aged 10–14 years who are usually economically active, expressed as a percentage of the total number of children in the same age group. This is also known as the age-specific activity rate for children aged 10–14 years and serves as an indicator of child labor and economic participation at an early age.

According to the Population and Housing Census 2021, the child economic activity rate in Gandaki Province is 2.82%, compared to 3.98% for Nepal as a whole. Palika-wise, it ranges from 0.00% in Narpa Bhumi Rural Municipality to 18.75% in Varagung Muktichhetra Rural Municipality. Among the eighty-five Palikas in Gandaki Province, forty-five have rates below the provincial average, while forty have rates at or above it.

$$\text{Child Economic Activity Rate} = \frac{\text{Economically active children of age (10 – 14) years}}{\text{Children of age (10 – 14) years}} \times 100$$

The total population of the local levels does not match the provincial total as institutional populations are not included in the local level population figures.

Child Economic Activity Rate

1

Proportion of children aged 10–14 years who are usually economically active, to the children in the same age group, 2021

Male Child Economic Activity, 2021

The male child economic activity rate represents the proportion of usually economically active male children aged 10–14 years to the total male children in the same age group, expressed as a percentage. This indicator reflects the extent of child labor participation among boys and is important for assessing child welfare and labor policy effectiveness. According to the Population and Housing Census 2021, in Gandaki Province, the male child economic activity rate was 2.87%, slightly lower than the national average of 4.01%. Palika-wise, the rate ranged from 0.00% in Narpa Bhumi Rural Municipality to 28.57% in Varagung Muktichhetra Rural Municipality. Among the eighty-five Palikas in Gandaki Province, forty-three had rates below the provincial average, while forty-two had rates at or above it.

$$\text{Male Children Economic Activity Rate} = \frac{\text{Economically active male children of age (10 – 14) years}}{\text{Male children of age (10 – 14) years}} \times 100$$

Male Child Economic Activity Rate

2

Proportion of usually economically active children aged 10-14 years to total children in the same age group in percent, 2021

Female Child Economic Activity, 2021

The female child economic activity rate is defined as the ratio of the number of usually economically active female children aged 10–14 years to the total number of female children in the same age group, expressed in percent. It is also called the age-specific activity rate for female children aged 10–14 years.

In Gandaki Province, the female child economic activity rate was 2.76%, compared to 3.94% for Nepal. Palika-wise, the rate ranged from 0.00% in Narpa Bhumi Rural Municipality to 13.41% in Biruwa Rural Municipality. Forty-one Palikas had rates below and forty-four Palikas had rates above the provincial figure.

$$\text{Female Children Economic Activity Rate} = \frac{\text{Economically active female children of age (10 – 14) years}}{\text{Female children of age (10 – 14) years}} \times 100$$

Female Child Economic Activity Rate

3

Ratio of usually economically active female children aged 10-14 years to total female children in the same age group, 2021

Child Marriage, 2021

The proportion of child marriage is the percentage of children aged 10 to 14 years who are married or in a union. This indicator shows the extent of early marriage among children and its social implications. In Gandaki Province, the proportion of child marriage among children aged 10–14 years was 0.42%, compared to 0.35% for Nepal. Palika-wise, the proportion ranges from 0.00% in Narpa Bhumi Rural Municipality to 2.08% in Varagung Muktichhetra Rural Municipality. Forty-five Palikas had Proportion below the provincial figure, while forty had above it.

$$\text{Child Marriage Proportion} = \frac{\text{Married Children of age (10 – 14) years}}{\text{Total children of age (10 – 14) years}} \times 100$$

Proportion of Male Child Marriage

5

Proportion of married male children aged 10-14 years to total male children in the same age group in percent, 2021

Female Child Marriage, 2021

The proportion of female child marriage refers to the percentage of girls aged 10 to 14 years who are married or in a union, indicating early marriage among female children. In Gandaki Province, the proportion of female child marriage was 0.56%, compared to 0.47% for Nepal as a whole. Palika-wise, the proportion ranges from 0.00% in many Palikas to a high of 3.70% in Varagung Muktichhetra Rural Municipality. Forty-six Palikas had Proportion below the provincial average, while thirty-nine had Proportion above it.

$$\text{Female Child Marriage Proportion} = \frac{\text{Married Girls of age (10 – 14) years}}{\text{Total Girls of age (10 – 14) years}} \times 100$$

Living With a Step Parent, 2021

Living with a step-parent is defined as residing with a couple where one is a biological parent and the other is a step-parent. The proportion of children living with a step-parent is the percentage of children below 16 years of age who live in such households out of the total children in the same age group. In Gandaki Province, this proportion is 0.64%, compared to 0.41% for Nepal as a whole. Palika-wise, many have 0.00%, while the highest proportion is 2.04% in Gharpajhong Rural Municipality. Thirty-nine Palikas had Proportion below the provincial average, while forty-six had Proportion above it.

$$\text{Proportion of Children Living with Step Parent} = \frac{\text{Number of children age below 16 years living with step parents}}{\text{Total children of age 16 years and below}} \times 100$$

Children Living with a Step-Parent

7

proportion of children below 16 years age living with a step-parent to the total number of children in the same age group, 2021

Children Living with Other Relatives and Others, 2021

For the purpose of the census, 'other relatives' include family members who are not a child's biological parents but may be brothers, sisters, uncles, aunts, grandparents, or other relatives. The category 'other' refers to individuals who are not biologically related to the child and are also not their employers. The ratio is defined as the number of children below 16 years of age living with 'other relatives' and 'others' as a percentage of the total children in the same age group.

In Gandaki Province, this proportion is 5.07%, compared to 3.46% for Nepal as a whole. Palika-wise, only Narpa Bhumi Rural Municipality has 0%, while the highest proportion is 11.05% in Galkot Municipality and sixty-seven Palikas have Proportion below the provincial average.

$$\text{Proportion of Children Living with Other Relatives and Others} = \frac{\text{Number of children age below 16 years living with other relatives and others}}{\text{Total children of age 16 years and below}} \times 100$$

Children Living with Other Relatives and Others

8

Proportion of children below 16 years living with other relatives and others to the total children in the same age group, 2021

Proportion of Currently Attending School Population of Aged (5-17) Years, 2021

This indicator reflects the percentage of children aged 5–17 years who are enrolled and actively attending a formal educational institution at the time of the census. It is a vital measure of educational access and retention among school-age children. In Gandaki Province, 94.28% of children aged 5–17 years were currently attending school, compared to 89.54% for Nepal. Palika-wise, the proportion ranged from 71.09% in Chumanubri Rural Municipality to 97.28% in Phedikhola Rural Municipality. Among the eighty-five Palikas, fifty-one had Proportion below the provincial average, while thirty-four were above it.

$$\text{Proportion of Currently attending School Population (5 – 17) Years} = \frac{\text{Currently school attending persons of age (5 – 17) years}}{\text{Total Population of age (5 – 17) Years}} \times 100$$

Proportion of School Ever Attending Population Aged (5–17) Years, 2021

This indicator measures the percentage of children aged 5–17 years who had attended school in the past but were not currently attending at the time of the census. It reflects early school dropouts or temporary discontinuation from formal education. In Gandaki Province, 4.27% of children aged 5–17 years had ever attended school but were not currently attending, compared to 5.24% for Nepal. Palika-wise, the proportion ranged from 2.07% in Phedikhola Rural Municipality to 15.07% in Varagung Muktichhetra Rural Municipality. Among the eighty-five Palikas, thirty-eight had Proportion below the provincial average, while forty-seven were above it.

$$\text{Proportion of School Ever attending Population (5 – 17) Years} = \frac{\text{School Ever attending persons of age (5 – 17) years}}{\text{Total Population of age (5 – 17) Years}} \times 100$$

Proportion of Population Ever Attending School

percentage of children aged 5–17 years who had attended school in the past, 2021

Proportion of School Never Attending Population Aged (5–17) Years, 2021

This indicator shows the share of children aged 5–17 years who had never attended school at the time of the census. It highlights exclusion from educational opportunities and is crucial for assessing access to basic education in different communities. In Gandaki Province, 1.02% of children aged 5–17 years had never attended school, compared to 5.12% for Nepal. Palika-wise, the proportion ranged from 0.34% in Phedikhola Rural Municipality to 18.07% in Lo Ghekar Damodarkunda Rural Municipality. Among the eighty-five Palikas, forty had Proportion below the provincial average, while forty-five were above it.

$$\text{Proportion of School Never attending Population in (5 – 17) years} = \frac{\text{School Never attending persons of age (5 – 17) years}}{\text{Total Population of age (5 – 17) Years}} \times 100$$

Proportion of Population Never Attending School

Proportion of children aged 5–17 years who had never attended school in percentage, 2021

Proportion of School Never Attending Male Aged (5–17) Years, 2021

This indicator reflects the proportion of male children aged 5–17 years who had never attended school. It highlights gendered gaps in access to basic education, particularly in remote and marginalized areas. In Gandaki Province, 1.08% of male children aged 5–17 years had never attended school, compared to 4.88% for Nepal.

Palika-wise, the proportion ranged from 0.00% in several Palikas to a maximum of 25.71% in Lo Ghekar Damodarkunda Rural Municipality. Among the eighty-five Palikas, forty-two had Proportion below the provincial average, while forty-three were above it.

$$\text{Proportion of School Never attending Male in (5 – 17) years} = \frac{\text{School Never attending male of age (5 – 17) years}}{\text{Total male of age (5 – 17) Years}} \times 100$$

Proportion of Male Never Attending School

proportion of male children aged 5–17 years who had never attended school, 2021

Proportion of School Never Attending Female Aged (5–17) Years, 2021

This indicator reflects the proportion of female children aged 5–17 years who had never attended school. It highlights persistent gender disparities in educational access, particularly affecting young girls in remote or disadvantaged areas. In Gandaki Province, 0.96% of female children aged 5–17 years had never attended school, compared to 5.37% for Nepal. Palika-wise, the proportion ranged from 0.17% in Tarakhola Rural Municipality to 18.40% in Chumanubri Rural Municipality. Among the eighty-five Palikas, thirty-nine had Proportion below the provincial average, while forty-six were above it.

$$\text{Proportion of School Never attending female in (5 – 17)years} = \frac{\text{School Never attending female of age (5 – 17)years}}{\text{Total female of age (5 – 17)Years}} \times 100$$

Female Ownership of Assets, 2021

The proportion of households with female ownership of assets is an important indicator of women's economic empowerment, decision-making capacity and security within the household and society. According to the Population and Housing Census, this proportion is defined as the ratio of the number of households reporting at least one female owning any assets (house, land or both) to the total number of households, expressed as a percentage.

In Gandaki Province, 28.29% of households reported female ownership of any assets (house, land or both), compared to 23.86% for Nepal as a whole. Palika-wise, this proportion ranged from 7.55% in Tamankhola Rural Municipality to 42.06% in Narpa Bhumi Rural Municipality. Among the eighty-five Palikas in Gandaki Province, sixty-four had Proportion below the provincial average, while twenty-one were above it.

$$\text{Proportion Households with Female Owning any Assets} = \frac{\text{Households with female owning assets}}{\text{Total Households}} \times 100$$

Female Ownership of Both House and Land

4

Ratio of households with female owning house and land to total households in percent, 2021

Gender Imbalance, 2021

The gender imbalance in adult literacy is an important indicator reflecting disparities in educational attainment between adult males and females. It is calculated as the ratio of literate females to literate males aged 15 years and above multiplied by the sex ratio for the same age group. A lower value indicates a greater gender disparity in adult literacy. In Gandaki Province, the gender imbalance in adult literacy is 0.82, compared to 0.79 for Nepal as a whole. Palika-wise, this ratio ranges from 0.50 in Lo Ghekar Damodarkunda Rural Municipality to 0.87 in Pokhara Metropolitan City.

Among the eighty-five Palikas in Gandaki Province, sixty-six Palikas have gender imbalance ratios below the provincial figure, while nineteen Palikas have ratios at or above it.

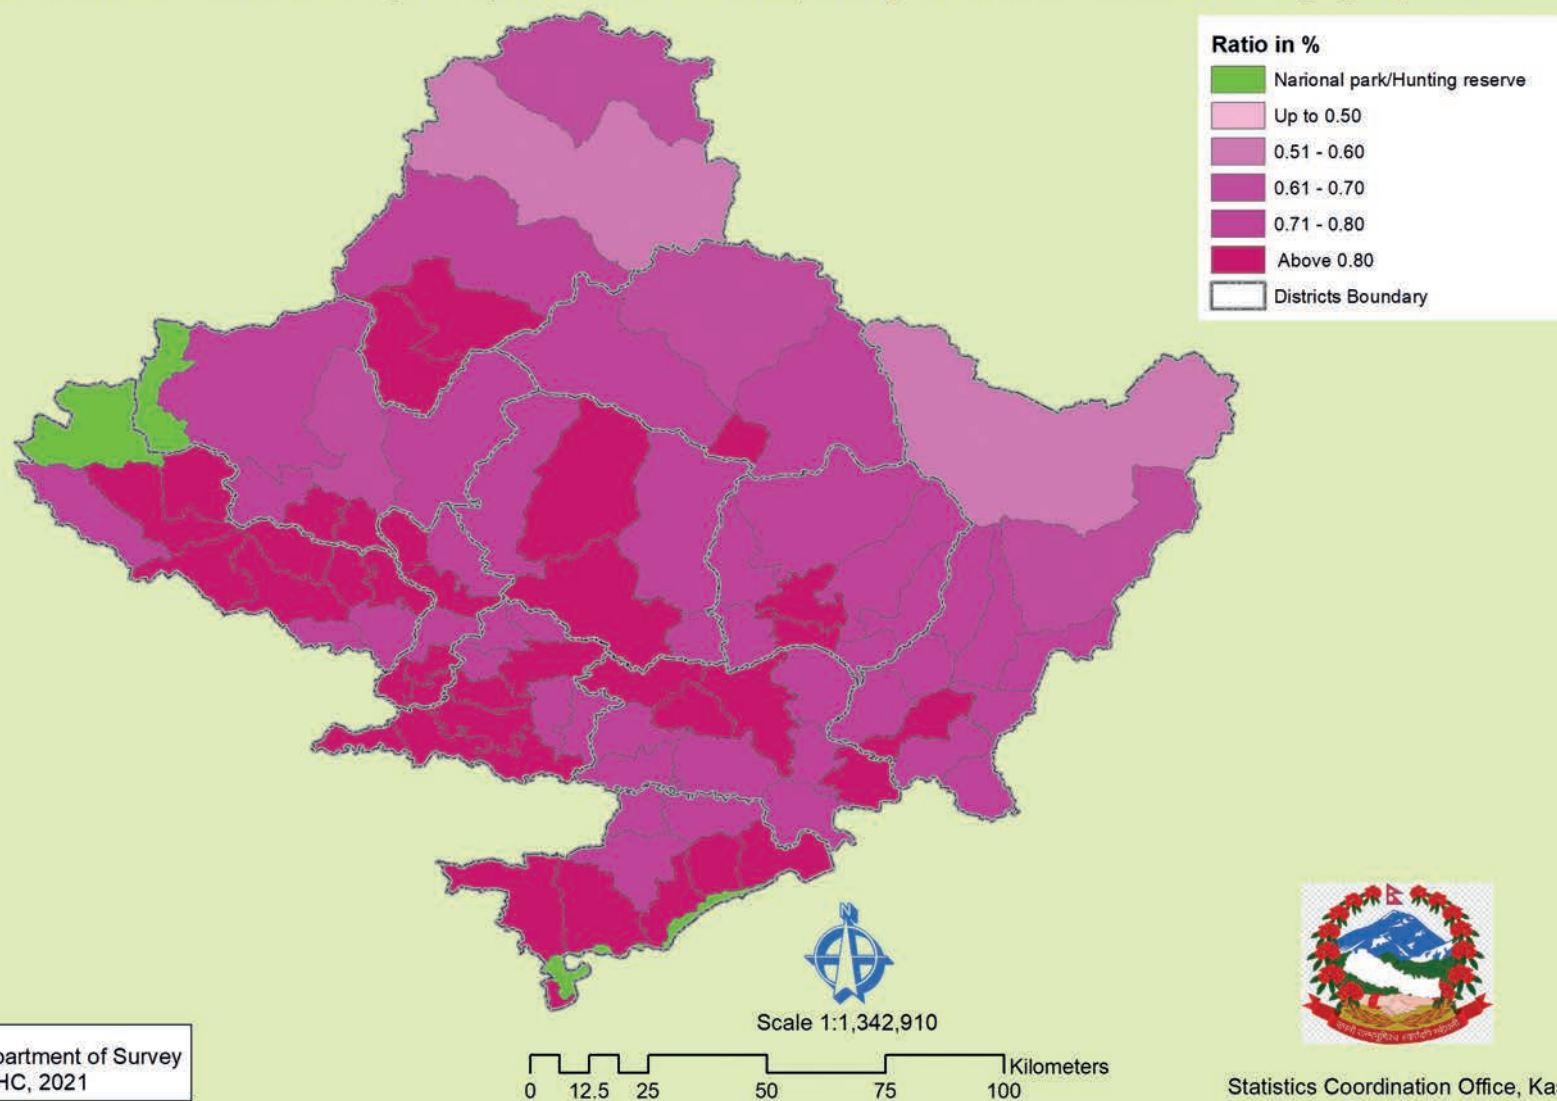

$$\text{Gender Imbalance in Adult Literacy} = \frac{\text{Literate Female of age 15 Years and above}}{\text{Literate male of age 15 Years and above}} \times \text{Sex ratio of 15 years and above}$$

Gender Imbalance in Adult Literacy

Ratio of literate female to literate male aged 15 years and above multiplied by the sex ratio for the same age group, 2021

Proportion of Widows, 2021

The proportion of widows women is an important demographic and social indicator reflecting patterns in marital disruption due to the death of a spouse, as well as social circumstances affecting widowhood. It is defined as the ratio of the total number of widows to the total number of ever-married women aged 10 years and above expressed as a percentage.

In Gandaki Province, this proportion is 11.31%, compared to 9.28% for Nepal as a whole. Palika-wise, the proportion ranges from 6.41% in Lomanthang Rural Municipality to 17.22% in Narpa Bhumi Rural Municipality. Among the eighty-five Palikas in Gandaki Province, thirty Palikas have Proportion below the provincial average, while fifty-five Palikas have Proportion at or above it.

$$\text{Proportion of Widow} = \frac{\text{Number of widows}}{\text{Total ever married female}} \times 100$$

Proportion of Widowers

Ratio of widowers to the number of ever-married males aged 10 years and above, 2021

Proportion of Divorced or Separated, 2021

The proportion of divorced or separated persons is an important demographic indicator reflecting marital stability, social change and potential vulnerabilities, particularly among women in many societies. It is defined as the ratio of the total number of divorced or separated persons to the total ever-married population aged 10 years and above expressed as a percentage.

According to the Population and Housing Census 2021, in Gandaki Province, the proportion of divorced/separated persons is 1.29%, compared to 0.83% for Nepal as a whole. Palika-wise, the proportion ranges from 0.52 % in Bihadi Rural Municipality to 2.93% in Annapurna Rural Municipality (Myagdi District). Among the eighty-five Palikas in Gandaki Province, fifty-three had Proportion below the provincial average, while thirty-two were above it.

$$\text{Proportion of Divorced or Separated} = \frac{\text{Number of divorced or separated persons}}{\text{Total ever married persons}} \times 100$$

Proportion of Divorced or Separated Persons

Proportion of divorced or separated persons to the total ever-married population aged 10 years and above, 2021

Prevalence of Marriage before Age 15 among Persons Aged 20–24, 2021

Early marriage remains a significant social issue, particularly its implications for health, education and social outcomes. This indicator represents the proportion of individuals aged 20–24 who were married before reaching the age of 15, expressed as a percentage.

In Gandaki Province, the prevalence of marriage before age 15 among persons aged 20–24 is 1.20%, compared to 1.86% at the national level. Palika-wise, this proportion ranges from 0.00% to a maximum of 3.52% in Ghiring Rural Municipality. Among the eighty-five Palikas in Gandaki Province, thirty-six had prevalence rates below the provincial average, while forty-nine had rates at or above it.

$$\text{Proportion of Marriage Before 15 years} = \frac{\text{Number of persons of age (20 – 24) years married before age 15 years}}{\text{Total ever married persons of age 20 – 24 years}} \times 100$$

Prevalance of Female Marriage Before 15 Years of Age

Proportion of female aged 20–24 who were married before reaching the age of 15, 2021

Prevalence of Marriage before Age 18 among Both Sex (Age Group 20-24), 2021

Marriage before the age of 18 has significant implications for education, health and social development. This indicator measures the proportion of individuals aged 20 to 24 who were married before reaching 18, expressed as a percentage.

In Gandaki Province, the prevalence of marriage before age 18 among both sex (age 20-24) is 11.87%, compared to 14.10% for Nepal as a whole. Palika-wise, this proportion ranges from 0.00% in Lomanthang Rural Municipality to 24.46% in Ghiring Rural Municipality. Among the eighty-five Palikas in Gandaki Province, thirty-two had rates below the provincial average, while the rest were at or above it.

$$\text{Proportion of Marriage Before 18 years} = \frac{\text{Number of persons age (20 – 24) years married before age 18 years}}{\text{Total ever married persons of age 20 – 24 years}} \times 100$$
